THE SAU CONCEPT

Spring Arbor University is a community of learners distinguished by our lifelong involvement in the study and application of the liberal arts, total commitment to Jesus Christ as the perspective for learning, and critical participation in the contemporary world.

From the Office of the President

Our Values

- **We are committed**
to Jesus Christ as Savior and Lord and affirm the importance of learning grounded in God's Creation and in His uniquely authoritative revelation through Scripture.
- **We are committed**
to a liberal arts education involving the pursuit of all truth as God's truth, the development of Christian character, and the living integration of faith and learning.
- **We are committed**
to the value and potential of every human being as created in God's image and thus accountable to Him and responsible for effective, redemptive participation in society and culture.

As a Spring Arbor University online student, your growth and success - academically, professionally and personally - are our focus. Even though you may not be physically present on campus, you are part of a community of learners who are distinguished by our lifelong involvement in the study and application of the liberal arts, a total commitment to Jesus Christ as the perspective for learning, and critical participation in the contemporary world.

As leaders in adult online education, we understand that you need flexibility and support. That is why I encourage you to fully engage with your fellow students, the faculty and your student success advisor. Each will enrich your academic experience in ways you never imagined possible.

You are here to receive a quality education and to advance your career. Keep these goals top of mind as you engage in critical thinking by asking questions in your pursuit of wisdom. Demonstrate your personal commitment to responsible, ethical leadership and effective communication through the original work you do here. Remember: The skills, knowledge and abilities you gain as a Spring Arbor University student will serve you well long after you have completed your degree.

We appreciate your interest in Spring Arbor University and wish you the best in your academic endeavors.

Dr. Brent Ellis
President

About SAU Online

Since 1873, Spring Arbor University has helped students pursue wisdom by offering an education grounded in the Christian faith. What began as a small elementary and secondary school in the late 1800s has evolved into a premier private Christian university that offers engaging online programs designed to meet the unique needs of busy, working adults. While we're not the only university to offer online degree programs, our distinction lies in our total commitment to providing educational excellence within a Christ-honoring and supportive online community.

- Christian Universities Online's article "50 Best Value Christian Colleges and Universities" ranks SAU as the fifth best value nationwide and second best in the Midwest.

- Christian Universities Online named Spring Arbor University in their *Best Online Christian Graduate Schools Guide*.

- *U.S. News & World Report* ranks Spring Arbor University in the top tier of the "Midwestern Regional Universities" category of colleges and universities.

- Spring Arbor University is ranked No. 5 in the Top 20 Online MSN Programs 2015 by Best Value Schools.

- Ranked by *The Economist* as No. 1 in economic value for Christian universities in Michigan and No. 2 for all universities in Michigan.

- Named a "College of Distinction" for 2015-2016. This means that SAU has engaged students, great teachers, a vibrant community, and successful outcomes.

“What a blessing it is to be an SAU graduate student. Not only am I investing in my future and in the development of my career, but I am surrounded by a community of mentors and scholars who are also committed to integrating Christ’s love into today’s business world.”

- Chelsea Page, MBA

Accreditation

The Higher Learning Commission (HLC) - All degrees offered by Spring Arbor University are accredited by The Higher Learning Commission, 30 N. LaSalle St., Suite 2400, Chicago, IL 60602. 1.800.621.7440.

Spring Arbor has been approved by the Michigan Department of Education to offer online reading courses for elementary and secondary teachers that are required by Michigan law for initial certification renewal. The courses are EDU 624 for elementary and EDU 625 for secondary.

The social work program is accredited by the Council on Social Work Education (CSWE) which ensures students, employers, and graduate social work programs that our graduates have received an education that meets CSWE's rigorous standards.

The baccalaureate degree program in nursing and master's degree program in nursing at Spring Arbor University is accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791.

State Authorization

SAU is authorized to offer online education across the nation, with exceptions for nursing programs in AL, AZ, LA, NY, SD, and WA (Nurse Educator only).

Awards and Recognition

As the popularity of online degree programs grows, the number of schools offering online degrees grows as well. When researching online schools to earn your degree, you want to make sure you are looking only at accredited colleges. Accreditation is important because it means the university is held to a certain standard. You also will want to compare the school's rankings and any recognition awarded by third-party sources. This way, you will know that you're receiving a quality education that is recognized for its student satisfaction, instructional quality and credibility.

Spring Arbor University Online offers highly-ranked, highly-respected educational programs for busy adults. In addition to being accredited by the Higher Learning Commission, we've received numerous awards and rankings for our degree programs including:

- Ranked in *U.S. News & World Report* Best Colleges: Regional Universities Midwest Rankings
- Ranked in the 50 Best Christian Colleges and Universities*
- Named in the Best Online Christian Graduate Schools Guide*
- Named in the 50 Most Affordable Christian Colleges in the U.S.*
- Ranked by *The Economist* as No. 1 in economic value for Christian universities in Michigan and No. 2 for all universities in Michigan

**Christian Universities Online*

Student Support

SAU Online is a pioneer and leader in online adult education. We understand your needs, and we welcome you with an online environment specifically created to enhance your strengths and support your journey.

- An Admissions Representative will help you choose a program that best fits your needs and walk you through the admissions process.
- Our Financial Aid Staff will give you accurate information on financial resources, based on your specific needs and circumstances.
- You will have direct access to SAU's highly acclaimed instructors.
- Upon acceptance, you will be assigned your own Student Success Coach, who will be your personal concierge from day one to graduation day.
- Our Tech Support Team will help you with any technical issues you may have.
- Throughout your program, you'll enjoy rich opportunities to strengthen your walk with God, build your professional network, master subjects in your sphere of influence and build lifelong friendships with fellow Christians around the world.
- A Graduate Career Advisor will help you develop a career plan and will notify you of opportunities, experiences and resources related to your career plan.
- You are assigned an Academic Advisor when you are accepted who will recommend schedules, monitor your progress, answer program-related questions and direct you to appropriate support services.

WHEN DO CLASSES START?

Most classes have six start dates per calendar year. To see start dates for your program, go to online.arbor.edu or call an Admissions Representative at **1.844.621.0900**.

SAU Online Programs

Spring Arbor University offers affordable, accredited, Christ-honoring online degrees designed to broaden your professional reach, enrich your faith, and make you more marketable in your sphere of influence. As an SAU Online student, you enjoy an engaging curriculum that prepares you to pursue a more purposeful career with confidence. It's a fully integrated approach to online education that's specifically designed to inform and transform the mind, body and spirit of adult learners.

Online Learning Community

Spring Arbor University understands the importance of having an online support network. In addition to instructors, staff and peers who know exactly what it's like to be an adult online learner, you are assigned your own Student Success Coach who works with you on work-life balance, personal and professional development, career goals, and more.

From the comfort of your own home, you can submit assignments, take tests and review class resources. You can also enjoy engaging podcasts, interesting threaded discussions and thought-provoking videos that transform you in ways you never thought possible.

Keeping you connected is our priority, which is why we offer so many ways to keep in touch - email, chat, discussion boards, live audio-conferencing, a state-of-the-art learning management system, iTunesU® and more.

Financial Aid

There are many different sources of financial aid available to those who qualify at Spring Arbor University Online. We will work with you to identify the financial benefits for which you may qualify, including state and federal aid, military discounts, and tax benefits.

Bachelor of Social Work Online

Prepare to become a competent, confident, engaged and ethical social worker committed to social and economic justice. Learn to provide social work services to individuals, families, groups, organizations and communities. Develop your professional practice while focusing on the values of service, social and economic justice, dignity and worth of the person, the importance of human relationships, as well as integrity and competence in the practice of social work.

Accredited by the Council on Social Work Education (CSWE), the Bachelor of Social Work Online program helps students develop the core skills necessary to improve relationships, develop solutions and connect with clients on a deeper, more spiritual level. Pulling from their real-world experience, our faculty create learning opportunities that reflect the realities of current social work practice. In addition, we've made it convenient to fulfill your BSW fieldwork requirements by allowing you to conduct your internship in your community.

Suited to fit you, this 124-credit hour BSW focuses on both theory and skill development, and students with the correct transfer credits may complete it in as few as 20 months.

PROGRAM OVERVIEW:

- Total Credit Hours: 124
- Tuition per Credit: \$384 / \$587
- Total Tuition: \$56,751
- Application Fee: \$30.00
- Registration Fee: \$40 per semester
- Technology Fee: \$105 per semester
- Program Fees: SWK447 has a course fee of \$72

Bachelor of Social Work Online Curriculum

Required BSW Courses

- POL 213 or POL 214 American National Government or State and Local Government (3)
- SOC 101 Introduction to Sociology (3)
- SWK281 Introduction to Social Work (3)
- SWK305 Human Behavior in the Social Environment (3)
- SWK311 Racial and Ethnic Relations (3)
- SWK335 Interviewing (3)
- SWK340 Practice with Individuals and Families (3)
- SWK352 Research Design (3)
- SWK442 Social Welfare Policies (3)
- SWK446 Practice with Groups (3)
- SWK447 Practice with Communities and Organizations (3)
- SWK450 Internship (10)
- SWK480 Senior Seminar (2)

The above represents BSW specific courses. The degree also includes general education courses (40 credits) and electives (39 credits).

Bachelor of Social Work Curriculum Descriptions – Required Courses

■ **SWK281 Introduction to Social Work**

An introduction to the field of social work. Curriculum will focus on various practice settings, the history of social work, and the purposes and values that guide social work practice with individuals, groups, organizations, communities and social welfare. Case studies and videos are used to introduce the social issues and vulnerable populations with which social work is concerned. You will be encouraged to assess your potential as a social worker through self-reflection and course assignments.

■ **SWK305 Human Behavior in the Social Environment**

An overview of normal biological, psychological, social and spiritual development of individuals from a life-span and family life-cycle perspective. Curriculum will emphasize how the interaction of the individual, culture, race, gender and the social environment affect human behavior using social systems theory. Issues of gender and other current social problems associated with the family life-cycle will also be addressed. This course provides the theoretical foundation for social work practice with individuals, families, groups, organizations and communities.

■ **SWK311 Racial and Ethnic Relations**

This course explores the cultures and experiences of minority ethnic groups in the United States and the impact of prejudice, discrimination and racism on these same groups and on white society.

■ **SWK335 Interviewing**

An introduction to the research-based theory and techniques of interviewing for the helping relationship. This is a pre-practice course that will teach interviewing skills necessary for effective practice with individuals, families, groups, organizations and communities. Role-playing will be used to practice skills within the classroom setting, as well as interview assignments outside the classroom.

Bachelor of Social Work Curriculum Descriptions – Required Courses

■ **SWK340 Practice with Individuals and Families**

This course will cover theoretical foundations of generalist social work practice with individuals and families. Theories of Human Behavior and Social Environment (HBSE) will be applied to practice of assessment, goal-setting, intervention, termination and practice evaluation. Special attention will be given to intervention with diverse and vulnerable populations. Case materials and role-playing will also be used. Problem-solving processes will also be covered, with attention given to their practice and application with groups, organizations and communities.

■ **SWK352 Research Design**

Basic theory of research design is used to design a proposal for doing program outcome evaluation, needs assessment and single subject research. This course primarily covers design and analysis of quantitative research, with an introduction to qualitative research methods. The course material will also prepare students for reading and using professional research articles.

■ **SWK442 Social Welfare Policies**

This course reviews the historical development and philosophical basis of social work's response to those in need and of social welfare policy in general. It will also examine the current welfare system, enabling students to develop beginning practice skills in the construction, analysis and implementation of social welfare policy at local, state and national levels. This course will prepare students to effectively utilize social policy as a generalist social worker.

■ **SWK446 Practice with Groups**

Theories of group behavior and the impact of group participation on human behavior are covered in this course, with emphasis given to use of these theories in applying the problem-solving methods for treatment and task groups. Systems theory is used to understand how the social work profession makes use of groups to accomplish individual, family, organizational and/or community goals. Content will cover issues of diversity within and between various groups in our society. Focus will also be group dynamics, group development, group decision-making, use of self within group dynamics, group leadership skills and evaluation of group practice.

■ **SWK447 Practice with Communities and Organizations**

This course builds on theories of human behavior in the social environment (explored in both SWK 305 and SWK 446) by providing additional theory of community and organizational behavior. The primary focus is on a macro-perspective involving work both with and in the community. The course is designed to teach students how social work uses knowledge and skills in organizing and planning to change or reform social conditions in order to achieve better organization and coordination of community systems for meeting human needs. Students integrate their knowledge of theory and practice by developing and implementing a group project in the community.

■ **SWK450 Internship**

The internship requires participation in a social service program in a community agency, under the educational direction of social work professionals and university faculty. Students advance their knowledge of the profession and refine their generalist practice skills. The internship will involve 400 hours of work in a social service setting.

Bachelor of Social Work Curriculum Descriptions – Required Courses

■ **SWK480 Internship Seminar**

This seminar is designed to integrate the concepts, knowledge and values learned in previous coursework with agency experience. This capstone course provides opportunities for students to share learning experiences from agency placement and to demonstrate their competencies through a series of integration assignments.

Bachelor of Social Work Online Admission Requirements

Application to the online BSW major is required before junior level practice courses are taken. Freshmen, sophomores and transfer students can declare their intent to major in social work and will be assigned to a Student Success Advisor who will help them prepare for admission to the major. Application to the major takes place after completion of COR100, ENG104 and SWK281. Transfer students who have completed the equivalent of SWK281 at another accredited program may provisionally take one semester of junior-level courses while they apply to and are accepted into the program. The decision as to whether all requirements are adequately met for admission to the social work major will be made by the social work faculty.

- A completed application and fee
- Transcripts from all schools attended (HS transcript only needed if student has taken fewer than 26 graded college credits)
- ACT/SAT scores needed if taken within the last three years/writing sample required if ACT/SAT score is over three years old
- GED test must have an average standard score of 500 for regular admission
- For transfer students, a cumulative grade point average of 2.5 is needed
- Completion of 40 credits of general education and liberal arts requirements, which may be fulfilled at Spring Arbor University Online
- Successful completion of IDS312 and SWK281 (C or better)
- Personal interview with social work faculty
- ACT composite score of 20 or SAT score of 940

Bachelor of Science in Human Services Online

Prepare to become a competent generalist social worker, dedicated to Christ, sensitive to and appreciative of diversity, committed to social and economic justice, and ready to empower people, families, groups, organizations and communities. Within the context of a Christian worldview, learn to exhibit the knowledge, skills, and abilities necessary for effectively managing people, projects, and processes within an organizational environment.

Accredited by The Higher Learning Commission, the Bachelor of Science in Human Services helps students develop the core skills to understand of the causes of and treatments for mental disorders, the major models of human development and behavior among individuals and groups, and the diversity of races and cultures that compose U.S. society. A rigorous and fulfilling curriculum instructs in the social sciences, psychology, principles of social service, human services policy, planning and evaluation, social services law and administration, and applications to particular issues, services, localities, and populations. Earning your bachelor's in human services will prepare you for a master's in counseling or social work.

PROGRAM OVERVIEW:

- Total Credit Hours: 124
- Tuition per Credit: \$399
- Total Tuition: \$49,476
- Application Fee: \$30.00
- Registration Fee: \$40 per semester
- Technology Fee: \$105 per semester

Required Human Services Courses

Required Human Services Courses

- COM 354 Applied Social Media (3)
- PHI 314 Ethics (3)
- PSY 305 Abnormal Psychology (3)
- PSY 422 Methods and Procedures of Counseling (3)
- SOC 311 Racial and Ethnic Relations (3)
- SWK 305 Human Behavior in the Social Environment or PSY 309 Lifespan Development (3)
- SWK 352 Research Design (3)
- ORM 368 Financial Resource Management or ORM 403 Organizational Behavior (3)

To complete required coursework, choose two of the following courses:

- ORM 368 Financial Resource Management (3) (if not already used)
- ORM 403 Organizational Behavior (3) (if not already used)
- PSY 242 Death, Grief and Loss (3)
- PSY 351 Statistics for Behavioral Sciences (3)
- PSY 354 Social Psychology (3)
- PSY 375 Psychology of Personality (3)
- SOC 246 Substance Abuse and Society (3)

The above represents specific courses for the Human Services major (30 credits). The degree also includes general education courses (40 credits) and electives (54 credits).

Bachelor of Human Services Curriculum Descriptions – Required Courses

■ COM 354 Applied Social Media

Explores all aspects of social media communication. Students develop a strategic mindset and explore creative and scientific approaches for creating, curating and managing content. Topics explored: analysis, audience, branding, ethics, measurement, planning, writing, qualifications and more. Assigned activities lead students to achieve Hootsuite Social Media Certification (\$300 value) at the end of the course.

■ PHI 314 Ethics

Analyzes selected current and vital, moral problems such as those in medical, legal and political ethics; race, sex and other forms of discrimination; the impact of technology in human values; war and peace; and poverty and hunger. Topics vary with concerns of students. Ethical resources are the great philosophers as well as Christian thinkers. It is advisable for students to complete PHI 200 Introduction to Philosophy or equivalent prior to taking this course for adequate prerequisite knowledge needed for course success.

■ PSY 305 Abnormal Psychology

Designed to introduce students to the major psychological disorders, with a primary focus on diagnosis, etiology and treatment of abnormal behavior. Prerequisite: PSY 100 Introduction to Psychology

■ PSY 309 Lifespan Development

Provides students with an integrated approach to the biosocial, cognitive, and psychosocial aspects of human development across the lifespan and in a variety of multicultural contexts. Prerequisite: PSY 100 Introduction to Psychology

■ PSY 422 Methods and Procedures of Counseling

A combination of various theories of counseling, methodology and interviewing. Prerequisites: PSY 305 Abnormal Psychology or PSY 375 Psychology of Personality, and junior standing

Bachelor of Human Services Curriculum Descriptions – Required Courses

■ **SOC 311 Racial and Ethnic Relations**

Examines cultures and experiences of minority ethnic groups in the U.S., and the impact of prejudice, discrimination and racism on these minority groups and on white society. Cross-listed SWK 311

■ **SWK 305 Human Behavior in the Social Environment**

An overview of biological, psychological and social development of individuals from a lifespan and family life-cycle perspective. An emphasis on how the interaction of the individual, culture, race, gender and the social environment affect human behavior using social systems theory. Issues of gender and other current social problems associated with the family life cycle will be addressed. Provides the theoretical foundation for social work practice with individuals, families, groups, organizations and communities. It is advisable for students to complete BIO 101 Human Biology, PSY 100 Introduction to Psychology, SOC 101 Introduction to Sociology and SWK 281 Introduction to Social Work or equivalent courses prior to taking this course. It is the student's responsibility to be equipped with prerequisite knowledge required for course success.

■ **SWK 352 Research Design**

Basic theory of research design is used to design a proposal for program outcome evaluation, needs assessment and single subject research. Covers design and analysis of quantitative research with introduction to qualitative research methods. Prepares students for reading and using professional research articles. Provides a foundation for understanding how research methods can be used to evaluate practice at a micro- and macro-level. It is advisable for students to complete SWK 351 Statistics or equivalent course prior to taking this course. It is the student's responsibility to be equipped with prerequisite knowledge required for course success.

■ **ORM 368 Financial Resource Management**

Examines the basic concepts of financial management, commonly used financial terms, development of financial statements, and the integral role financial management plays corporate business strategy. Topics include balance sheets, income statements, statement of cash flows, annual reports, financial ratios, time value of money, breakeven calculations and annual budget.

■ **ORM 403 Organizational Behavior**

Students examine key theories within the field of organizational behavior and their practical implications. Organizational, group, and individual-level behaviors are considered. Topics explored include leadership styles, performance, motivation, group dynamics, interpersonal relationships, and other related sub-topics.

■ **PSY 242 Death, Grief and Loss**

Grief and loss as experienced in various human settings: nursing homes, hospitals, and private homes, or through death or divorce, examined from different viewpoints, (e.g., doctor, chaplain, emergency room nurse, the bereaved, etc.). Cross-listed SOC 242 and SWK 242.

■ **PSY 351 Statistics for Behavioral Sciences**

An introductory applied statistics course that uses statistical computer software. Topics include types of variables (nominal, ordinal and interval/ratio), frequency and percentage distributions as well as graphical representations of data, measures of central tendency and dispersion and confidence intervals. Hypothesis testing for statistical significance is done via CHI Square, t-tests (for independent and dependent samples), ANOVA, correlation and simple linear regression. Multiple linear regression may be included. Primarily for students concentrating in psychology, social work or political science. Cross-listed POL 351.

Bachelor of Social Work Curriculum Descriptions – Required Courses

- **PSY 354 Social Psychology**

Humans operate within a social context and the experimental research that contributes to an understanding of this phenomena. Emphasis on current research and methodology from sociology and psychology. Prerequisite: PSY 100 Introduction to Psychology

- **PSY 375 Psychology of Personality**

An intensive study of the major theories of personality with a primary emphasis on application to the students' personal experiences. Culminates with students formalizing their own theory of personality. Prerequisite: PSY 100 Introduction to Psychology

- **SOC 246 Substance Abuse and Society**

Addresses the issues of alcohol and drug abuse in contemporary society from a historical perspective and provides students with information that they can use to bring a Christian solution to the problem of substance abuse in their lives and the lives of those they meet personally and professionally. Cross-listed PSY 246 and SWK 246.

Bachelor of Science in Human Services Admission

- A completed application
- Application fee
- Transcripts from all schools attended (HS Transcript only needed if student has taken less than 26 graded college credits)
- ACT/SAT scores needed if taken within the last 3 years
(ACT score of 20 or an SAT of 940 (Critical Reading and Math) and a high school GPA of 2.60)
- Writing sample required if ACT/SAT score is over 3 years old
- (GED) test must have an average standard score of 500 for regular admission.
- For transfer students a cumulative grade point average of 2.0 is needed
- Applicants whose scores and GPA are below these recommendations may be admitted with probationary status.

Master of Arts in Early Childhood Education

An online Master of Arts in Early Childhood Education from Spring Arbor University prepares students to work with children 8 years old and younger. Learn strategies to help young children who are struggling to read or who have self-regulation and behavior challenges. This program is taught by highly qualified faculty and equips preschool through third-grade teachers with the skills and strategies needed to meet the needs of young children.

Students who are elementary-certified, hold a valid Michigan certificate, and plan to complete the endorsement (ZS) in Early Childhood Education must pass, upon completion of coursework, the Michigan Test for Teacher Certification for Early Childhood. If outside of Michigan, check your state Department of Education to find out how this works for you.

If you want a Master of Arts in Early Childhood Education but are not planning to obtain the endorsement (ZS) and/or you live outside of Michigan, you will be awarded your degree upon successful completion of coursework. This is perfect for someone with a degree in another field - such as social work or psychology - who wants to work with young families and children.

Spring Arbor University has been accredited by The Higher Learning Commission since 1960, and the Master of Arts in Early Childhood Education is in good standing with the Council for the Accreditation of Educator Preparation.

PROGRAM OVERVIEW:

- Total Credit Hours: 33
- Tuition per Credit: \$600
- Total Tuition: \$19,800
- Application Fee: \$30
- Registration Fee: \$40/sem
- Technology Fee: \$105/sem

- ECE640 Emergent Literacy (3)
- ECE665 Early Childhood Curriculum and Methods (3)
- ECE668 Young Children with Special Needs (3)
- ECE678 Intervention Strategies for Young Children with Developmental Delays (3)
- ECE680 Graduate Thesis and Field Study in Early Childhood (3)

Master of Arts in Early Childhood Education Curriculum Descriptions – Required Courses

- **ECE565 Early Childhood Social Foundations**
Provides comprehensive coverage of the complex socialization process and its effect on the development of children. Requires students to research their own socialization histories and evaluate their development in the light of major concepts presented in class. Each student will also develop a research proposal and carry out that research during the semester. A formal presentation of the findings will be presented in a formal paper/project.
- **ECE566 Early Childhood Growth & Development**
The prenatal stages of human development through age 8 are the focus of the course. Students will study normal and exceptional development of the physical, cognitive, emotional and social domains of young children (infant, toddler and pre-K through age 8) in the contexts of home and group settings. With this, assessment and diagnostic procedures will be studied. Some field observations and interactions required.
- **ECE620 Effective Behavior Management, Assessment & Evaluation in Early Childhood Education**
The focus of this course is assessing young children's development and the use of appropriate assessment practices in the ECE environment. Students will examine best practices in assessment and guidance of young children (infants, toddlers, preschool through grade 3) through in-depth research of contemporary theory and methodology. Through a systematic observation experience, students will determine the most appropriate method to guide children's behavior. As a result, the practitioner will develop strategies and practices to guide young children in developing acceptable and appropriate self-directed behavior as individuals and in group settings. A study of appropriate assessment techniques pertinent to child management and behavior that informs parents and teachers in selecting strategies that lead to approaches for better learning and intervention practices and self-regulation.

Master of Arts in Early Childhood Education Curriculum Descriptions – Required Courses

■ **ECE640 Emergent Literacy**

This course will explore the theories and research in emergent literacy and beginning reading, phonics instruction and spelling. Students will compare historical perspectives on language acquisition, beginning reading and writing, and the interrelationship of reading, writing, listening, and various stages of reading and writing, and spelling development, using a wide range of children's literature, poetry, creative dramatics and storytelling. Formal and informal methods of assessment will be conducted with emphasis on at-risk or struggling readers, particularly English Language Learners (ELLs).

■ **ECE665 Early Childhood Curriculum & Methods**

For teaching in a preschool or early elementary program. The basic curricular areas in preschool and early elementary grades are covered. Emphasis is on methods and techniques. Examines strategies, materials and model programs to aid preschool and primary teachers in classroom organization and instructional design.

■ **ECE668 Young Children with Special Needs**

Students will become familiar with the characteristics of young children (birth to 8 years) displaying special needs and with techniques for nurturing their development and interacting with parents. This course will include practice in observation and interaction, introduction to initial screening procedures and service provisions, planning and implementation of appropriate activities. In addition, students will address special education history, theory, models and laws pertaining to young children as well as inclusive curricular, assessment and family approaches, teaming and collaboration, and managing challenging behavior.

■ **ECE678 Intervention Strategies for Young Children with Developmental Delays**

Students will study the theories and implications of formal assessment in early childhood, examine the procedures for initiating and developing formal reporting assessment documents such as IEP, IAP and IFSP and develop the essential dispositions and skills to develop positive respectful relationships with children and caregivers when discussing assessment results. An integral part of the course will include creating and practicing strategies to remediate diagnosed special needs at the appropriate age and developmental level, creating an appropriate transition plan and exploring the role of technology in providing services for students. Through research, an appropriate transition plan will be implemented supporting the goals outlined through the IFSP or IEP, developed in collaboration with caregivers and various stakeholders.

■ **ECE616 Early Childhood Policies & Standards**

This course focuses on policies and regulations specific to early childhood care and educational settings. The course covers effective guidance of young children, infants and toddlers, through age 8, as individuals and within group settings; government regulations for early childhood programs and personnel; as well as ethical standards for certification of early childhood professionals. An in-depth analysis of selected topics that are pertinent to the care and education of young children in child development centers and early childhood school settings.

■ **ECE550 Developing Literacy & Reading Proficiency in Early Grades**

Through research of current best practices in reading development for struggling readers, students will identify appropriate interventions. Through small groups, strategies and techniques will be shared. A case study based on needs identified through assessments will be conducted.

Master of Arts in Early Childhood Education Curriculum Descriptions – Required Courses

■ **ECE530 Values, Ethics and Worldview**

Students examine the diversities (including but not limited to issues related to race, ethnicity, culture, language, religion, socioeconomic status, gender and ability) found in American classrooms. Considerations of how these characteristics affect teaching and learning are explored as students investigate and create practical methods of dealing with them in positive ways.

■ **ECE680 Graduate Thesis and Field Study in Early Childhood**

This course consists of a carefully planned sequence of experiences including but not limited to directed observations, conferences, small group instruction, whole class instruction and individualized instruction within the inclusive childcare/classroom setting. The field study is under the professional supervision of an education professor. It provides opportunities for the participant to synthesize and apply theoretical learning from a previous course within realistic, planned professional contexts.

Master of Arts in Early Childhood Education Online

Admission Requirements

- Official transcripts from the institution that granted the bachelor's degree
- Evidence of an earned bachelor's degree from a regionally accredited college or university
- A cumulative GPA of at least 3.00 preferred for the last two years of your bachelor's program
- Contact information for two references
- Teacher certification information (if applicable)
- Conviction disclosure
- Completed graduate application
- School of Education Graduate Program Admission Form

Master of Arts in Teaching English as a Second Language Online

SAU Online offers a unique faith-based approach to serving not only EL students in the classroom, but also the minds and hearts of people desiring to learn English around the world. Earning your Master of Arts in TESOL is advantageous for both U.S. teachers and professionals who want to teach in foreign countries.

For certified teachers, the Master of Arts in TESOL K-12 track meets the requirements for the ESL Endorsement and will qualify you to better serve EL students in your classroom or to become the ESL specialist in your building.**

PROGRAM OVERVIEW:

- Total Credit Hours: 33
- Tuition per Credit: \$600
- Total Tuition: \$19,800
- Application Fee: \$30
- Registration Fee: \$40/sem
- Technology Fee: \$105/sem

**CORE credit hours for the ESL (NS) Endorsement*

***Students taking the MATESOL K-12 Track can apply for the ESL Endorsement from the Michigan Department of Education after completing the 24-credit hours of CORE courses for the endorsement and passing the MTTC Test (NS).*

Master of Arts in TESOL in K-12 Education Curriculum Descriptions

■ TSL500 Linguistics for Teachers of English

This course provides a study of English as a system, the components of the language system: phonology, orthography, phonics morphology, syntax and the relatedness of language systems for those preparing to teach English to speakers of other languages. The coursework will compare different theories of language variation, social and academic language registers, the benefits of bilingualism, and how knowledge of sentence structure instruction fits into current practices in language teaching.

■ TSL501 Cross Cultural Competence in Communication

This course is designed to assist students in exploring personal biases and methods of overcoming them and the basic principles underlying multicultural education. This course provides an opportunity to develop appropriate teaching strategies, activities and materials and to adapt and evaluate curricula for use in culturally diverse, as well as homogeneous classrooms. Ten hours of lab experiences, which will help students apply the concepts, are included in the course requirements.

Master of Arts in TESOL in K-12 Education Curriculum Descriptions

■ **TSL502 TESOL Methods and Materials for Second Language Acquisition**

This course focuses on the pedagogical aspects of teaching English and the preparation of teaching materials for classroom use. Integrated methods and strategies will be explored for teaching listening, speaking, reading and writing to ELLs of diverse backgrounds and levels. This course requires highly constructive class participation and responsible out-of-class lesson assignment preparation for the lab setting. The goals of this course are to develop students' knowledge in the following areas: theories of second language acquisition, research-based pedagogy for ELLs, how to manage instruction for different levels of learners with diverse abilities, appropriate interactions with students and parents from diverse cultural backgrounds.

■ **TSL505 Assessment & Evaluation of Language Minority Students & Programs***

This course explores theoretical and practical aspects of language assessment and evaluation, particularly in measuring English language skills of students in ESL programs. The students will use the Michigan English Language Proficiency Assessment to assess listening, speaking, reading and writing. WIDA and DIBELS ELD standards will be reviewed and compared. Performance based and standardized assessment tools will be developed, used and evaluated in light of issues related to bias, social, political and psychological factors.

■ **TSL506 Literacy Instruction for English Language Learners (prerequisite: TSL502)**

RDG656 may be substituted for this course.

This course is a general overview of the interconnectedness of culture and reading and writing skill development. Students will review the developmental aspects of second language acquisition, as well as the developmental aspects of reading and writing, providing insights for the creation of programs for literacy development for English Language Learners. The course aims to develop an understanding of learners with intermediate language acquisition who are learning to read and write in English in the ESL and general education classroom. Students will assess the oral language proficiency, reading comprehension, vocabulary knowledge and writing skills of a case study student or small group. Reading comprehension and writing skill development strategies will be implemented with the case study individual or group. Challenges for developing phonemic awareness, spelling, vocabulary and comprehension with English Language Learners will be explored.

■ **TSL508 English Grammar Approaches for English Language Learners**

This course will enhance the classroom instruction of teachers of English Language Learners by blending classroom strategies with a study of the most important grammatical structures of the language. Students will become familiar with the meta-language and key concepts of English grammar. Students will develop lessons for the production of English in speaking and writing activities, with a focus on communicative competence. The course will target the most useful grammatical skills needed for beginning and intermediate level English Language Learners. Students will analyze spoken and written English of native and non-native speakers in order to understand and explain the most frequent error types of learners from different language groups.

Master of Arts in TESOL in K-12 Education Curriculum Descriptions

■ **TSL509 Sheltered Immersion (SIOP) for Content Area Teachers***

This course is built around the SIOP model for teaching content and language in mixed ability classrooms in K-12 settings. Students will develop an understanding of how to plan a supportive classroom learning environment for ELL students. Candidates will plan for multi-levels of diverse students using standards-based ESL and content curriculum. Candidates will design integrated activities that focus on listening, speaking, reading and writing goals that also address content objectives. Ten hours of observation and participation in a science, social studies or math classroom with ELLs is required.

■ **TSL600 Capstone Project, Practicum & Portfolio***

Teachers will build a web-based portfolio Practicum e-portfolio to demonstrate how they have met the criteria for selected National Board for Professional Teaching Standards, NCATE/TESOL and the Michigan ESL Endorsement standards. Knowledge of research in the field of Applied Linguistics will be demonstrated in a comprehensive literature review of an issue related to any one of the domains addressed in the standards. The topic will be pre-approved by the professor. Documentation of teaching competence and reflection will be part of the portfolio. The portfolio contents are a collection of the videos, screencasts, lesson plans, unit plans, article analyses, webliographies, article reflections, case studies, etc. that the student has produced as part of the TESOL coursework or during the field experience.

■ **TSL503 Methods of Teaching, Speaking & Listening with Beginners**

The course focuses on the pedagogical and teaching materials for classroom use when teaching children and adults as beginning speakers of English. Integrated methods and strategies will be explored for developing listening and speaking skills of beginning speakers of English of diverse backgrounds and levels. This course requires highly constructive class participation and responsible out of class lesson assignment preparation.

■ **TSL510 Integrity in Teaching English as Mission**

This course provides a study of integrity in effective English language programs in the United States and overseas. The coursework will consist of critically examining issues such as linguistic imperialism, teaching English as professionals in creative access countries, the need for integrity and the importance of adequate teacher training.

Master of Arts in TESOL in K-12 Education Electives

■ **EDU624 Elementary and Middle School Reading**

This course for pre-K through 6th grade teachers includes field experiences in the diagnosis and remediation of reading disabilities and provides the educator opportunity to engage with one reader to discover student strengths and needs and develop a case study. Course focuses include interest inventories, English Language Learning screening, visual and auditory discrimination tools, language expression and processing screening, phonemics, phonics, vocabulary, fluency, comprehension, spelling and writing assessment tools, and instructional strategies. Students will explore current models of reading assessment and support, as well as classroom applications designed to develop effective reading skills and dispositions, including differentiated instruction in response to student needs. For those holding an elementary certificate, this course satisfies the Michigan Department of Education reading requirement for new professional certificates issued after July 1, 2009, per 2007 PA 32, MCL 380.1531(4) (Previously PA118).

■ **EDU625 Secondary Reading**

This course for 6-12 grade teachers investigates issues in secondary reading and skill development. Focuses include differentiated instruction, interest inventories, fluency, comprehension, spelling and writing assessment tools, and instructional strategies. The course explores the skills and complexities of the reading process through classroom field experiences. Students will investigate a variety of instructional techniques to facilitate the development of effective readers and learners. The emphasis will be on practical research-based classroom applications. For those holding an elementary certificate, this course satisfies the Michigan Department of Education reading requirement for new professional certificates issued after July 1, 2009, per 2007 PA 32, MCL 380.1531(4) (Previously PA118).

■ **RDG628 Teaching Writing**

Teachers investigate writing development and applications across the curriculum as they design, facilitate and assess writing experiences and assignments in all subjects. Teachers develop methods and materials for writing process approaches, investigate instructional strategies for teaching genre and writing conventions, and explore the implications of standardized testing for writing instruction. Course focuses include workshop approaches, current research, experiential learning, and classroom applications of research and theory.

■ **RDG678 Children and Young Adult Learners**

A study of literature and its uses for K-12 students, including the most recently published materials, the role of children and young adult literature in developing literacy, standards for selection and evaluation of materials and strategies for involving students in particular types of literature comprise this course. Teachers apply criteria for selecting and evaluating literature from a historical perspective and in conjunction with critical theory. Teachers investigate research in the field and explore strategies to incorporate literature, including multicultural literature, into the curriculum in all subjects.

Master of Arts in TESOL Adolescent and Adult Education Curriculum Descriptions

■ **RDG628 Teaching Writing**

Teachers investigate writing development and applications across the curriculum as they design, facilitate and assess writing experiences and assignments in all subjects. Teachers develop methods and materials for writing process approaches, investigate instructional strategies for teaching genre and writing conventions, and explore the implications of standardized testing for writing instruction. Course focuses include workshop approaches, current research, experiential learning, and classroom applications of research and theory

■ **RDG678 Children and Young Adult Learners**

A study of literature and its uses for K-12 students, including the most recently published materials, the role of children and young adult literature in developing literacy, standards for selection and evaluation of materials and strategies for involving students in particular types of literature comprise this course. Teachers apply criteria for selecting and evaluating literature from a historical perspective and in conjunction with critical theory. Teachers investigate research in the field and explore strategies to incorporate literature, including multicultural literature, into the curriculum in all subjects.

■ **TSL500 Linguistics for Teachers of English**

This course provides a study of English as a system, the components of the language system: phonology, orthography, phonics morphology, syntax and the relatedness of language systems for those preparing to teach English to speakers of other languages. The coursework will compare different theories of language variation, social and academic language registers, the benefits of bilingualism, and how knowledge of sentence structure instruction fits into current practices in language teaching.

■ **TSL501 Cross Cultural Competence in Communication**

This course is designed to assist students in exploring personal biases and methods of overcoming them and the basic principles underlying multicultural education. This course provides an opportunity to develop appropriate teaching strategies, activities and materials and to adapt and evaluate curricula for use in culturally diverse, as well as homogeneous classrooms. Ten hours of lab experiences, which will help students apply the concepts, are included in the course requirements.

■ **TSL502 TESOL Methods and Materials for Second Language Acquisition**

This course focuses on the pedagogical aspects of teaching English and the preparation of teaching materials for classroom use. Integrated methods and strategies will be explored for teaching listening, speaking, reading and writing to ELLs of diverse backgrounds and levels. This course requires highly constructive class participation and responsible out-of-class lesson assignment preparation for the lab setting. The goals of this course are to develop students' knowledge in the following areas: theories of second language acquisition, research-based pedagogy for ELLs, how to manage instruction for different levels of learners with diverse abilities, appropriate interactions with students and parents from diverse cultural backgrounds.

■ **TSL503 Methods of Teaching, Speaking & Listening with Beginners**

The course focuses on the pedagogical and teaching materials for classroom use when teaching children and adults as beginning speakers of English. Integrated methods and strategies will be explored for developing listening and speaking skills of beginning speakers of English of diverse backgrounds and levels. This course requires highly constructive class participation and responsible out-of-class lesson assignment preparation.

Master of Arts in TESOL Adolescent and Adult Education Curriculum Descriptions

■ **TSL505 Assessment & Evaluation of Language Minority Students & Programs***

This course explores theoretical and practical aspects of language assessment and evaluation, particularly in measuring English language skills of students in ESL programs. The students will use the Michigan English Language Proficiency Assessment to assess listening, speaking, reading and writing. WIDA and DIBELS_ ELD standards will be reviewed and compared. Performance based and standardized assessment tools will be developed, used and evaluated in light of issues related to bias, social, political and psychological factors.

■ **TSL506 Literacy Instruction for English Language Learners (prerequisite: TSL502)**

RDG656 may be substituted for this course.

This course is a general overview of the interconnectedness of culture and reading and writing skill development. Students will review the developmental aspects of second language acquisition, as well as the developmental aspects of reading and writing, providing insights for the creation of programs for literacy development for English Language Learners. The course aims to develop an understanding of learners with intermediate language acquisition who are learning to read and write in English in the ESL and general education classroom. Students will assess the oral language proficiency, reading comprehension, vocabulary knowledge and writing skills of a case study student or small group. Reading comprehension and writing skill development strategies will be implemented with the case study individual or group. Challenges for developing phonemic awareness, spelling, vocabulary and comprehension with English Language Learners will be explored. Students will review current research into best practices for teaching reading and writing.

■ **TSL508 English Grammar Approaches for English Language Learners**

This course will enhance the classroom instruction of teachers of English Language Learners by blending classroom strategies with a study of the most important grammatical structures of the language. Students will become familiar with the meta-language and key concepts of English grammar. Students will develop lessons for the production of English in speaking and writing activities, with a focus on communicative competence. Teachers will build a web-based portfolio Practicum e-portfolio to demonstrate how they have met the criteria for selected National Board for Professional Teaching Standards, NCATE/TESOL and the Michigan ESL Endorsement standards. Knowledge of research in the field of Applied Linguistics will be demonstrated in a comprehensive literature review of an issue related to any one of the domains addressed in the standards. The topic will be pre-approved by the professor. Documentation of teaching competence and reflection will be part of the portfolio. The portfolio contents are a collection of the videos, screencasts, lesson plans, unit plans, article analyses, webliographies, article reflections, case studies, etc. that the student has produced as part of the TESOL coursework or during the field experience.

Master of Arts in TESOL Online Admission Requirements

- Official transcripts from the institution that granted the bachelor's degree
- Evidence of an earned bachelor's degree from a regionally accredited college or university
- A cumulative GPA of at least 3.00 preferred for the last two years of your bachelor's program
- Contact information for two references
- Teacher certification information (if applicable, not needed for Adolescent and Adult Track)
- Conviction disclosure
- Completed graduate application
- Writing sample
- Foreign Language Verification Form
- School of Education Graduate Program Admission Form

Master of Special Education Online

For those called to work with children with special needs, Spring Arbor University Online provides a comprehensive graduate degree program in Special Education with the choice of two endorsements, a 12-course Learning Disabilities concentration and a 13-course Autism Spectrum Disorder concentration.

This Master of Special Education online program is for both certified teachers and non-certified teachers who work in fields, such as occupational therapy, where a deep knowledge of the special needs population is desired. This program also prepares individuals to take a leadership role in the field of special education.*

PROGRAM OVERVIEW:

- Total Credit Hours: 36-37
- Tuition per Credit: \$600
- Total Tuition: \$21,600 - \$22,200
- Application Fee: \$30
- Registration Fee: \$40/sem
- Technology Fee: \$105/sem

**Teachers who complete the MSE and pass the MTTC test for the special education endorsement as required by the Michigan Department of Education can add the Special Education endorsement to their Michigan teaching certificate.*

Master of Special Education Online Curriculum

Foundation Courses

- SED500 Current Issues in Special Education (3)
- SED501 Support and Collaboration - Special and General Education, Parents, Professionals and Agencies (3)
- SED502 Human Development for Special Education (1)
- SED503 Law and Policy for Special Education (3)
- SED523 Assessment and Evaluation in Special Education (3)
- All students will take ONE of the following courses:
 - SED551 Student Teaching and Seminar (5) OR
 - SED552 Student Teaching and Research (5) OR
 - SED553 Research Applications with the Special Needs Population (5)

Learning Disabilities Concentration

- SED504 Classroom Management and Development of Social Competence for Students with Special Needs (3)
- SED520 Elementary Methods for Language Arts and Mathematics (3)
- SED521 Secondary Methods for Content Area Reading, Study Skills and Transition (3)
- SED522 Language Development and Instruction (3)
- SED524 Assistive Technology (3)
- SED525 Curriculum and Instruction (3)

Autism Spectrum Disorder Concentration

- SED530 Introduction to ASD (3)
- SED531 Language and Communication Development (3)
- SED532 Assessment and Intervention for ASD (3)
- SED533 Technology (2)
- SED534 Collaboration and Transition Planning for Students with ASD (2)
- SED535 Behavior Programming for Students with ASD (3)
- SED536 Curriculum and Instructional Methods for Students with ASD (3)

Master of Special Education Curriculum Descriptions – Foundation Courses

■ SED500 Current Issues in Special Education

Introductory overview of the special education field. The focus will be the needs of students with disabilities: knowledge of handicapping conditions, educational implications, legal considerations, procedures for identification and placement of student with disabilities, due process and privacy requirements, historical and philosophical background of special education and the instructional strategies applied in educational settings.

■ SED501 Support and Collaboration - Special and General Education, Parents, Professionals and Agencies

Provides information on identifying and accessing resources relevant to persons with disabilities and in creating a positive climate that facilitates learning and cooperation between all stakeholders. These resources may be within the school setting or from outside agencies. The course will also address factors that impede and facilitate the use of these resources and self-analysis of strengths and weaknesses for the purpose of becoming a more effective communicator and team member. Instruction

Master of Special Education Curriculum Descriptions – Foundation Courses

will be provided on the development of interpersonal skills needed to establish a positive social-emotional climate in the classroom that works collaboratively with and for differentiated student needs and relationships and brain-based strategies for effectively communicating with students, parents, colleagues and outside agencies. The course will also focus on important aspects of inclusion and the requirements for developing communication methods to make inclusion work. Modeling methods that facilitate participation on teams within the school, and effective strategies to supervise and empower the classroom aide, volunteers and paraprofessionals to be effective will also be discussed.

■ **SED502 Human Development for Special Education**

Complements an educational psychology course with emphasis on the exceptional development of special education students. Common mental, emotional, neurological, environmental and physiological conditions that affect learning will be explored.

■ **SED503 Law and Policy for Special Education**

Includes a study of the history of special education laws, each law's intent, and the working state and federal laws. Special emphasis placed on IDEA and the evolution of the Reauthorization of IDEA 2004. The learner will also be able to effectively communicate the needs and rights of persons with disabilities. Knowledge of institutional and administrative factors, which facilitate or impede delivery of services, will be studied. An understanding of the roles and organizational structures that regular and special education play in providing total services including the development of appropriate IEPs.

Master of Special Education – Learning Disabilities Concentration Descriptions

■ **SED504 Classroom Management and Development of Social Competence for Students with Special Needs**

Designed to provide students with a practical foundation in the principles of individual and group management structures. The course will enable students to not only understand basic behavioral management concepts but also demonstrate their ability to develop, implement and incorporate appropriate behavioral management techniques. The maintenance of appropriate academic and social behaviors in the special education classroom will be emphasized as well as the development of strategies in the areas of prevention, assessment, identification and intervention. These strategies will be used to help the LD student develop the self-management skills required for constructive social participation and independent learning. Many students with learning disabilities face challenges in the area of socialization; therefore, this class will include developing appropriate social behavior.

■ **SED520 Elementary Methods for Language Arts and Mathematics**

Focuses on the educational methods and strategies to meet the needs of the student with learning disabilities at the elementary level. Emphasis will be placed on the understanding of remedial techniques for reading, mathematics and written expression. Students will develop and implement lesson plans in an elementary classroom.

■ **SED521 Secondary Methods for Content Area Reading, Study Skills and Transition**

Focuses on the instructional methods and strategies to meet the needs of the student with learning and behavior challenges at the secondary school level. Emphasis will be placed on the understanding of techniques for academic supports within the content areas of reading, mathematics and written expression. This course focuses on the goals of secondary special education, which are to provide services to students with disabilities that will enable them to acquire the skills they need to function successfully in employment and community settings. This course will examine the teacher's role in transition planning and coordination.

■ **SED522 Language Development and Instruction**

Provides skill and techniques in understanding learning problems by focusing on the development of language as it relates to reasoning, thinking, listening, speaking, reading, writing and spelling. Emphasis will be placed on an understanding of the components of language, knowing how the assessment of these skills is conducted and what effect disorders in listening, speaking and thinking have on learning to read, write and spell. Finally, instruction will be provided on teaching strategies to help the language learning disabled student and additional information will be provided on resources the teacher can utilize to become a more effective teacher.

Master of Special Education – Learning Disabilities Concentration Descriptions

■ **SED523 Assessment and Evaluation in Special Education**

Provides instruction in appropriate procedures for the assessment and reporting of the student's reading, writing, mathematical and social skills. Emphasis will be placed on assessment methods that lead directly to diagnosing skill deficits and determining current level of functioning, which can be translated directly into goals, objectives and statements of progress on the child's IEP. Methods of evaluating instructional outcomes will be explored so that an ongoing instructional plan can be adjusted to meet the student's needs.

■ **SED524 Assistive Technology**

Provides an understanding of how adaptive technology may be used to enhance the education of students with disabilities. It teaches a framework for assessing special needs students' abilities, environment, required tasks and assistive tools. Students will investigate high-tech, mid-tech, low-tech and no-tech responses to the needs of students with disabilities. The focus will include a full range of disabilities and emphasis on using assistive technology to access the general education curriculum, development of assessment and lesson plans.

■ **SED525 Curriculum and Instruction**

Includes a study of research-based curriculum designs and strategies for the student with learning disabilities. Topics include preplanning, principles of curriculum decision-making, effective schools research, and participatory strategies for curriculum and instruction. The types of learning disabilities and the characteristics of each are discussed in light of curriculum design. Emphasis is placed on differentiating instruction for the child with learning disability (ies). Educators will acquire skills that will enhance student learning.

Master of Special Education – Autism Spectrum Disorder Concentration Descriptions

■ **SED530 Introduction to ASD**

This course provides students with an overview of Autism Spectrum Disorder. It addresses the process and methods of identification. Social issues and the implications of Autism Spectrum Disorder on an individual's life will be introduced. Current treatments and research will be introduced with a focus on evidence-based practices for students with ASD.

■ **SED531 Language and Communication Development**

This course examines procedures for assessment of communication, language and speech of students with autism spectrum disorder, and it will review strategies for promoting language and communication skills across the different environments.

■ **SED532 Assessment and Intervention for ASD**

This course will cover diagnosis criteria in the identification of students with Autism Spectrum Disorder. Students will understand the importance of early diagnosis and become familiar with recommended screening instruments for autism. Particular focus is placed on linking assessment data to implementation of meaningful interventions in all educational settings.

■ **SED533 Technology**

This course will cover assistive technology applications for students with Autism Spectrum Disorder. Emphasis will be placed on proper assessment, informed choices in equipment, training and implementation in the use of assistive technology devices, and progress monitoring of the impact of the use of assistive technology.

■ **SED534 Collaboration and Transition Planning for Students with ASD**

This course introduces students to the idea of collaboration as a special education professional. Prevocational and vocational planning as well as transitional issues will be discussed. Using supported employment, community-based instruction and skillful assessment of a young person's goals, strength and skills.

■ **SED535 Behavior Programming for Students with ASD**

In this course, students will review legal and ethical guidelines affecting behavior planning, as well as learning evidence-based practices for behavior interventions as related to students with Autism Spectrum Disorder. Focus will be placed on collaboration to determine the impact of multiple variables upon student behavior, to develop interventions based upon group consensus, and to review and modify interventions based upon data.

■ **SED536 Curriculum and Instructional Methods for Students with ASD**

This course will examine the most recent topics in the education of students with autism spectrum disorder (ASD). Participants in this course will examine evidence-based practices and effective interventions for students with ASD throughout the educational system. Research-based practices will be examined in this course along with the effective implementation of techniques and strategies in a variety of educational settings. In addition, the collaboration of all team members, including parents and guardians of students with autism, will be explored. This course will be a blended learning environment that will include course materials and lectures online in addition to pre-determined campus meetings with participants. The primary objective of this course is to prepare course participants to meet the educational needs of their students with autism and to collaborate effectively with all team members.

Master of Special Education – Autism Spectrum Disorder Concentration Descriptions

■ **SED551 Student Teaching and Seminar**

In this course, the student teacher will have opportunities to manage the classroom and learning activities of special education pupils. The student teacher assumes responsibility for directing the classroom. The seminar portion of the course will focus on topics specific to the special education field. The student teacher will be required to use the knowledge gained in their program and apply it in the classroom. He will collect artifacts for a portfolio that demonstrate an understanding of the unique needs of the student population and the practice of behavior analysis and interventions, assessment, collaboration, delivery of intense interventions, curriculum planning and implementation, assistive technology, and adherence to all the legal requirements of IDEA.

■ **SED552 Student Teaching and Research**

In this course, teacher-researchers develop and implement their special education research plans in a mentored special education teaching assignment in a K-12 setting. The teacher-researcher will have opportunities to manage the classroom and learning activities of special education pupils. The teacher-researcher assumes responsibility for directing the classroom. The seminar portion of the course will focus on the research topics specific to the special education field. Teacher-researchers develop and implement a research plan created from a review of literature that establishes the theoretical context. The teacher-researcher conducts data collection, analysis and interpretations leading to recommendations for action, based on their findings.

■ **SED553 Research Applications with the Special Needs Population**

Systematic study, using action research methodology on a significant issue in their profession working with students with disabilities. Their project is to be relevant to their local community or school with regard to students with special needs. Researchers develop and implement a research plan created from a review of the literature that establishes the theoretical context. The researcher conducts data collection, analysis and interpretations leading to recommendations for action, based on their findings. Their findings will be presented in a formal paper according to the guidelines given in this course and APA style.

Master of Special Education Online Admission Requirements

- Official transcripts from the institution that granted the bachelor's degree
- Evidence of an earned bachelor's degree from a regionally accredited college or university
- A cumulative GPA of at least 3.00 preferred for the last two years of your bachelor's program
- Contact information for two references
- Teacher certification information (if applicable)
- Conviction disclosure
- Completed graduate application
- School of Education Graduate Program Admission Form

Master of Arts in Strategic Communication and Leadership Online

The only program of its kind in the U.S., this 18-month Master of Arts in Strategic Communication and Leadership program pairs students with mentors who are influencers in communication. Mentors share valuable insights, professional development tips and personalized support throughout the program.

Working with your mentor, you learn skills most important to communication professionals. You also individualize your program and develop a sustainable professional growth plan.

Throughout the program, you build a professional ePortfolio. This digital portfolio serves as a place to collect, reflect upon and collate creative assets based on your learning experiences at Spring Arbor University Online. Upon graduation, your ePortfolio becomes a powerful and shareable resource for career advancement.

PROGRAM OVERVIEW:

- Total Credit Hours: 30
- Tuition per Credit: \$738
- Total Tuition: \$22,140
- Application Fee: \$30
- Registration Fee: \$40/sem
- Technology Fee: \$105/sem

Master of Arts in Strategic Communication and Leadership Online Curriculum

The Basics

- COM505 Communication as Calling (3)
- COM504 Communication Theory and Worldview (3)
- COM608 Research Method and Applications (3)

The Building Blocks

- COM601 Interpersonal Communication (3)
- COM604 Digital Media Strategies (3)
- COM603 Group and Public Communication (3)
- COM610 Advertising and Public Relations (3)
- COM510 Communication Leadership (3)
- COM508 Writing for Results (3)
- COM612 Conflict Resolution (3)

Master of Arts in Strategic Communication and Leadership Curriculum Descriptions

The Basics

- **COM505 Communication as Calling**
Explore your career opportunities and vocational impulses while working with a professional mentor to individualize your program and develop a sustainable professional growth plan. Then ground your ambition in humility, stewardship and service.
- **COM504 Communication Theory and Worldview**
Kurt Lewin said “there is nothing as practical as a good theory.” Learn what others have already learned as you discover our discipline’s best ideas about how communication works. From the Greeks to the geeks, few topics have been examined so thoroughly.
- **COM608 Research Method and Applications**
Develop the skills to design, interpret and evaluate research by examining and applying quantitative and qualitative methods.

The Building Blocks

- **COM601 Interpersonal Communication**
Learn how communication works when we are up-close and personal. The course examines how we interact as friends, lovers, leaders, followers and coworkers.
- **COM604 Digital Media Strategies**
Students will learn how to expand personal and institutional influence through the strategic use of mobile applications, social media, and various web-based tools and platforms. Includes content creation, management and planning in both formal and informal contexts. Covers ethical frameworks as well as theories of diffusion, innovation and identity.
- **COM603 Group and Public Communication**
Examine how communication impacts group dynamics, conflict, team building, leadership and public presentations.
- **COM610 Advertising and Public Relations**
How does advertising and public relations work? Or not work? Traditional and nontraditional techniques are explored as you examine both theory and practice.

Master of Arts in Strategic Communication and Leadership Curriculum Descriptions

■ **COM508 Writing for Results**

We asked 50 leading scholars and professionals what you need to succeed, and they pretty much all said the same thing: the ability to write clearly, effectively and appropriately. We'll help you master the basics as you create messages that are well-crafted and audience-tuned.

■ **COM612 Conflict Resolution**

Not all conflict can be avoided. Nor should it. But most conflict can be managed more effectively and productively. Learn how to do this.

■ **COM510 Communication Leadership**

Explore communication styles of effective leaders through an analysis of research and practice. Discover your strengths and work on your weaknesses.

Master of Arts in Strategic Communication and Leadership Online Admission Requirements

- A bachelor's degree from a regionally accredited college or university
- A 3.0 GPA for at least the last two years of the bachelor's degree
- Official transcripts from the institution that granted the bachelor's degree
- Three recommendations from professional/academic/clergy individuals
- Recent writing sample (a published magazine, newspaper, or journal article; an undergraduate or graduate research paper; or a work-related proposal)
- Personal Goals Statement of two pages or less, which briefly describe personal or professional goals as they relate to graduate studies in communication at a Christian university
- Completed graduate application

Master of Business Administration

Business professionals who strive for a purpose higher than profit maximization achieve greater results. From small-business entrepreneurs to corporate executives on Wall Street, the people who make the most profound differences are those who stand on principles of service and positively impact people and communities by their actions.

Developed and delivered by the faculty of the Gainey School of Business, SAU Online provides a unique experience for students to consider how their purpose-driven contributions may help restore the dignity of the business profession in today's organizations.

Suited to fit you, this 36-credit MBA offers concentrations in Healthcare Administration, Human Resource Development, Management, Organizational Consulting and Strategic Leadership and can be completed online in as few as 18 months.

Master of Business Administration Curriculum Descriptions – Core Courses

■ **MBA060 MBA Orientation**

Introduces students to Spring Arbor University and the Gainey School of Business MBA program. Familiarizes students with the Blackboard learning management system that supports learning through electronic access to learning materials from virtually anywhere, connects the learning community and promotes collaboration. Students practice using Blackboard tools, interact with peers, monitor course progress and grades, and obtain feedback from an instructor through Blackboard.

■ **MBA617 Leadership in Business**

Introduces students to leadership in business administration as a foundation for effective management of the organization. Explores leadership from the perspective of the practicing manager and focuses on individual, group and organizational leadership. Covers the nature of leadership, leading change, leadership effectiveness, leadership development, and traditional and emerging leadership theories. Special emphasis is placed upon self-leadership and professional leadership assessment of personal strengths and weaknesses in handling specific managerial issues and responsibilities.

Master of Business Administration Curriculum Descriptions – Core Courses

■ **MBA631 Accounting for Managers**

Introduces students to the fundamental concepts and principles of accounting as a discipline to support managerial decision-making in businesses. Examines the use of information for data-driven decision-making, including organizational level performance measurements. Covers financial ratio calculations and analysis, preparation of financial statements, taxes, accounting liquidity, contribution margin, budgeting and auditing issues.

■ **MBA622 Statistics for Business Managers**

Introduces students to data-driven decision-making using a statistical thinking framework. Emphasis placed upon the use of statistical data for identifying, understanding, interpreting, and solving business scenarios and issues. Develops skills necessary to identify business problems, collect data following appropriate protocols and methods, and analyze data using statistical techniques.

■ **MBA661 Marketing for Managers**

Introduces the principles of service and stewardship through marketing management. Focuses on developing an understanding of the role of markets and marketing from an economic thinking perspective including an analysis of product markets and developing marketing strategies that will provide sustainable competitive advantage. Special emphasis is placed upon the integration of concepts, principles, and techniques of marketing through application within client organizations. Topics include: customer value and satisfaction, market research and surveys, marketing segmentation differentiation, positioning, and the development and execution of marketing plans.

■ **MBA607 International Business (NYC trip)**

Introduces key aspects of contemporary international business management and implications of international business on organizational strategy, structure and function. Coverage includes ethics in business, country differences, trade and investments, global monetary systems and competition in a global marketplace. Topics include Poverty Cure, human rights, global human

resource development, conference environment papers and group presentations. As a part of the MBA607 course, students attend an International Business Summit as part of a four-day trip to New York City. The university covers the costs of accommodations (i.e., hotel, food) to participate in the summit. Students are responsible for travel arrangements and expenses.

or

■ **MBA607A International Business (no trip)**

Introduces key aspects of contemporary international business management and implications of international business on organizational strategy, structure and function. Coverage includes ethics in business, country differences, trade and investments, global monetary systems, and competition in a global marketplace. Topics include Poverty Cure, human rights, global human resource development, and conference environment individual presentations, peer reviews and critiques.

■ **MBA688 MBA Capstone Study**

The MBA capstone experience emphasizes the integration and application of acquired knowledge and skills from the MBA core and concentration curriculum. Focuses on the identification of a group/work unit/team or organizational level issue, problem or opportunity, as well as the proposed solution to improve organizational performance. Students will conduct an organizational assessment, review of the literature, explain the issues using appropriate concepts and theories, create a proposal to address the problem, and develop a final business consultancy report and presentation. The student works with a real organization/client, and the client provides an assessment of the student's performance and contribution to the organization.

MBA Curriculum Descriptions – Healthcare Administration Concentration

Develops management knowledge and skills necessary for healthcare professionals and builds business acumen required for effective healthcare leadership. The concentration courses focus on the complexities and trends in the healthcare industry by focusing on contemporary issues in healthcare administration, policy, economics, quality and strategy in healthcare management.

- **MBA641 Trends in Healthcare Administration & Management**

Addresses contemporary issues in the field of healthcare and the factors influencing the structure, delivery, and financing within healthcare systems. Examines the roles of various healthcare institutions and professional groups providing health services. Covers emerging trends that impact healthcare in the U.S. as well as the leadership challenges associated with healthcare administration. Special emphasis on making informed decisions related to healthcare administration and management topics that concern modern healthcare administrators.

- **MBA642 Managerial Finance in Healthcare**

Examines the fundamentals of financial management in the healthcare sectors. Prepares non-financial healthcare professionals with skills necessary to manage and control costs while simultaneously investing resources in strategic opportunities. Focuses on the use of financial analysis techniques, financial reasoning and financial tools for effective decision-making and planning in a healthcare setting. Special emphasis on financial liquidity, solvency and measuring efficiency of healthcare organizations using key ratio information.

- **MBA643 Managing Quality in Healthcare**

Identifies the principles of quality improvement necessary for creating a quality culture in healthcare. Examines tools and methods of planning and implementing quality improvement initiatives in healthcare. Addresses both clinical improvements related to the delivery of quality patient care and process improvements related to the processes necessary in supporting the delivery of quality patient care. Special emphasis on methodology for improving quality in healthcare organizations, process improvement tools and measurement systems, Six Sigma, lean management techniques, and medical informatics.

MBA Curriculum Descriptions – Human Resource Development Concentration

Develops knowledge and skills necessary to leverage organizational human resources to improve individual performance and enhance organizational effectiveness. Strengthens skills in problem-solving, strategic thinking and critical analysis necessary for identifying and solving human-related issues within an organization. Prepares students to promote employee and organizational growth through individual and organizational learning.

- **MBA647 Workplace Learning and Professional Development**

Explores the major issues relevant to workplace learning and development. Develops skills in needs analysis, learning and development methods, method selection, development plans, and assessment. Covers adult learning theory, knowledge and development. Emphasizes principles of traditional and contemporary approaches to workplace learning and development in organizations. Special emphasis on the practical application of learning development methods and assessments to ascertain factors influencing effective workplace learning strategies.

- **MBA648 Human Resource Development**

Explores major issues of managing human resources. Develops skills in assessing human resource needs for career development and organizational effectiveness. Covers principles of adult learning through designing practical applications in diverse work settings. Special emphasis on current topics in the field of human resource development, including the assessment, design, implementation and evaluation of HRD programs; personal, professional and organizational development; and application of HRD in diverse contexts. Various types of training programs will be examined, including onboarding, skills and technical, performance management, employee wellness, career management, organization and management development, and diversity.

- **MGT651 Management of Organizational Behavior**

Introduction to the management of behavior in organizations, the field of industrial and organizational psychology, and various aspects of people in the workplace. Covers issues related to employee development through training and learning, employee productivity, well-being, attitudes, behaviors, motivation, and leadership. Explores principles of organizational behavior and management such as how people work, where they work and how the workplace operates. Emphasizes the complexity of organizational functioning and importance of the management of organizational behavior.

MBA Curriculum Descriptions – Management Concentration

Develops skills necessary for effective traditional management in organizations. The concentration is designed for individuals interested in strengthening traditional business administration and management knowledge and skills.

- **MBA654 Strategic Planning & Management**

Introduces the concepts of strategic planning and management and considers the vision, mission and goals of the organization. Provides students with a framework for conducting strategic planning in the organizational environment. Examines the balanced scorecard approach to strategic planning and management for translating strategy to action. Special emphasis is placed upon the cyclical development of pertinent information necessary for strategic planning and management.

- **MBA648 Human Resource Development**

Explores major issues of managing human resources. Develops skills in assessing human resource needs for career development and organizational effectiveness. Covers principles of adult learning through designing practical applications in diverse work settings. Special emphasis on current topics in the field of human resource development, including the assessment, design, implementation and evaluation of HRD programs; personal, professional and organizational development; and application of HRD in diverse contexts. Various types of training programs will be examined, including onboarding, skills and technical, performance management, employee wellness, career management, organization and management development, and diversity.

- **MBA651 Management of Organizational Behavior**

Introduction to the management of behavior in organizations, the field of industrial and organizational psychology, and various aspects of people in the workplace. Covers issues related to employee development through training and learning, employee productivity, well-being, attitudes, behaviors, motivation and leadership. Explores principles of organizational behavior and management such as how people work, where they work, and how the workplace operates. Emphasizes the complexity of organizational functioning and importance of the management of organizational behavior.

MBA Curriculum Descriptions – Organizational Consulting Concentration

Develops a strong foundation in assessing, researching and finding possible solutions to personnel, group/team/work unit and organizational problems. Develops requisite skills necessary for understanding, predicting and influencing individual and group behavior in organizations as the foundation for leading effective organizational development and change initiatives. Organizational consultants apply behavioral science and organizational leadership principles in the work context to positively influence individuals, groups and organizations.

- **MBA647 Workplace Learning and Professional Development**

Explores the major issues relevant to workplace learning and development. Develop skills in needs analysis, learning and development methods, method selection, development plans, and assessment. Covers adult learning theory, knowledge and development. Emphasizes principles of traditional and contemporary approaches to workplace learning and development in organizations. Special emphasis on the practical application of learning development methods and assessments to ascertain factors influencing effective workplace learning strategies.

- **MBA657 Strategic Leadership**

Examines characteristics and skills that allow leaders to make positive and strategic contributions to their organizations. Focuses on the development of strategic leadership skills including the development of strategic thinking and strategic actions for superior organizational performance. Emphasizes the analysis of leader traits, skills, styles and characteristics and the influence on the strategic leadership of organizations.

- **MBA658 Organizational Consulting**

Examination of best consulting practices for internal and external change agents. In-depth exploration and practice on contracting, assessment and diagnosis, data collection, feedback techniques, implementation of planned change initiatives, resistance to change, and other psychodynamics in the organization related to change. Emphasizes the collaborative consulting approach and the collaborative consulting cycle as well as change management models and effective change management consulting techniques.

MBA Curriculum Descriptions – Executive Leadership Concentration

Prepares business professionals to predict and influence individual and group behavior through strategic leadership. The concentration is designed for organizational professionals already proficient in administrative management. Broadens knowledge and skills through strategic leadership, strategic planning and advanced management focus.

- **MBA657 Strategic Leadership**

Examines characteristics and skills that allow leaders to make positive and strategic contributions to their organizations. Focuses on the development of strategic leadership skills including the development of strategic thinking and strategic actions for superior organizational performance. Emphasizes the analysis of leader traits, skills, styles and characteristics and the influence on the strategic leadership of organizations.

- **MBA654 Strategic Planning & Management**

Introduces the concepts of strategic planning and management and considers the vision, mission and goals of the organization. Provides students with a framework for conducting strategic planning in the organizational environment. Examines the balanced scorecard approach to strategic planning and management for translating strategy to action. Special emphasis is placed upon the cyclical development of pertinent information necessary for strategic planning and management.

- **MBA651 Management of Organizational Behavior**

Introduction to the management of behavior in organizations, the field of industrial and organizational psychology, and various aspects of people in the workplace. Covers issues related to employee development through training and learning, employee productivity, well-being, attitudes, behaviors, motivation and leadership. Explores principles of organizational behavior and management such as how people work, where they work, and how the workplace operates. Emphasizes the complexity of organizational functioning and importance of the management of organizational behavior.

Master of Business Administration Online Admission Requirements

- Bachelor's degree from a regionally accredited college or university
- A minimum overall 3.0 GPA for the last two years of undergraduate coursework
- An official transcript from the institution granting the bachelor's degree
- At least two recommendation surveys (provided) from professional/academic individuals
- Completed graduate application
- Approval by the MBA Admission Committee

- NUR422 Spiritual Dimensions of Healthcare (3)

RN to BSN Curriculum Descriptions

■ **NUR321 Professionalism and Professional Values**

This course further develops and strengthens core professional values by emphasizing the pursuit of practice excellence. The ANA Standards and Scope of Nursing Practice and Ethical Code for Nurses are examined as well as professional associations and practice regulating bodies. The course explores the role of nursing theory to guide practice. The formal literature review process and the value of evidence-based practice (EBP) are introduced. E-portfolios are introduced as a method of documenting academic progress and professional development. The course provides foundational professional concepts in legal, ethical, and patient-centered care in preparation for future courses across the educational continuum and roles in advanced practice nursing.

■ **NUR452 Evidence Based Practice I**

Three (1) credit components will be taken concurrently with carousel courses.

These one-credit component/modules are designed to guide the baccalaureate student to identify practice issues, appraise and integrate evidence, and evaluate outcomes. The e-portfolio is used as a tool to document competencies, track academic progression through the six EBP components, and document academic preparation as students navigate the Capstone project.

1. The student will learn the value of evidence-based practice (EBP), the use of EBP to support quality and safety measures in practice, and models for applying evidence to clinical practice. The concept of the Senior Project is introduced. Students identify educational need in practice or a patient safety issue and then search the databases to begin a literature review to gather evidence to support that issue for their Senior Project. Students learn the basic steps of the Excel spreadsheet to document their ongoing literature review.
2. The student is introduced to the basic elements and concepts of statistics and the use of statistical data in nursing research studies. The students continue to define their chosen practice or educational topic for the Senior Project and continue the literature review. Excel instruction progresses during this component to build on the skills obtained in the first component.
3. The student learns the value of research, implications for practice, and the steps of the research process. Ethical issues and the advocacy role of the nurse in protecting the rights of human subjects are recognized. Students learn how bias can influence the design and the implications are explored. The course stimulates critical thinking through locating, evaluating, and critiquing research studies and provides the opportunity

RN to BSN Curriculum Descriptions

to develop a practicum proposal based on scientific research and evidence-based practice. The literature review process continues throughout the course with a written proposal for the Senior Project submitted at the end of Component 452.c.

■ **NUR341 Patient Centered Care I**

This course has a gerontology focus that utilizes the principles and techniques of holistic nursing assessment and care planning guided by evidence-based interventions and nursing theory. How an aging population affects the healthcare system and nursing practice are explored. Nursing assessment incorporates review of systems, health promotion, preventative care need, and palliative care planning.

■ **IDS300 Biblical Perspectives**

As a Christian liberal arts university, Spring Arbor University is committed to nurturing an appreciation for the resources of the Scriptures for creative personal faith and human life in the modern world. This course is designed to foster knowledge and understanding of the literature and history of the Bible and integration of faith, living, and learning.

■ **NUR360 Information Management/Patient Care Technologies**

This course emphasizes the use of technology and information systems for clinical decision-making. Students learn the skills necessary to use information management and patient care technologies to deliver safe and effective care. The course explores quality improvement information systems that monitor patient outcomes and required regulatory reporting. Ethical and legal issues related to the use of IT, including copyright, privacy, and confidentiality issues are investigated.

■ **NUR442 Patient Centered Care II**

Evidence-based health techniques for disease prevention, health promotion, and self-management of chronic conditions are investigated. Younger adult assessment and health history interview techniques are explored. The assessment findings are used to formulate

a holistic, culturally sensitive health promotion plan and apply a theory as a basis for care. The course focuses on effective communication in facilitating client movement toward health and wellness.

■ **NUR344 Clinical Prevention/ Population Health**

The course discusses theory and concepts of community/public/global health including health care systems in transition, health policy, and epidemiology. The Public Health/Community Health Nurse's (PH/CHN) role as partner with the community in health promotion, disease and injury prevention, and population health are applied to patient scenarios. Students utilize teaching, learning, and behavioral change theories and concepts to plan care.

■ **NUR434 Quality Leadership**

This course focuses on the professional nurse's role in applying the principles of leadership and management to navigate systems in health care organizations across the continuum of care. The course explores the nurse leader's role in quality and safety, the regulatory environment, policy, and advocacy for EBP. The course provides opportunities to improve critical reasoning, interdisciplinary communication techniques, and conflict resolution. Change management and conflict resolution theories are utilized in practice situations.

■ **NUR453 Evidence Based Practice II**

Three (1) credit components will be taken concurrently with carousel courses.

1. Reviewing the basic elements and concepts of the research process including levels of measurement, measurement tools, data presentation and descriptive statistics.
2. Students learn to use Excel for statistical equations in preparation for the utilization of nursing research and using data to make evidence-based changes in practice. Integration of the most widely used statistical methods and the use of Excel promotes deeper understanding within the context of health care research and evidence-based nursing practice.

RN to BSN Curriculum Descriptions

3. Additional concepts of statistical analysis and major epidemiological study designs are explored. Statistical concepts are applied to evidence-based nursing practice.
- **NUR494 Senior Nursing Project**

This course provides the student with the practical experience of applying and integrating the concepts and theories learned so far in the program to a setting (community or clinical). Students assess and identify a patient safety or care process problem, a practice discrepancy, or an educational need supported by research through a comprehensive literature review. Using the nursing process, students design and implement their project and the BSN portion of the program culminates with a project presentation to faculty, peers, and interested parties.
 - **IDS400 Values: Personal and Social**

This is a capstone course in which the student formulates a philosophy of life providing the base for such concerns as professional ethics, accountability in government and nursing practice, respect for human rights, and a responsible lifestyle in our contemporary world. Ethical theories and personal values are examined through readings, analysis of issues and classroom discussion.
 - **NUR422 Spiritual Dimensions of Healthcare**

This course examines the increasing emphasis on spiritual well-being and healing environments as elements of health care. Techniques and emphases are examined from a Christian perspective.

Registered Nurse to Bachelor of Science in Nursing Online Admission Requirements

- At least one year experience working as a registered nurse preferred
- Associate degree in nursing or diploma in nursing leading to RN licensure
- An official transcript from all previous institutions attended with a minimum cumulative GPA of 2.5 for all prior college work
- Completion of at least 58 transferable semester hours
- A writing sample
- An unrestricted, unencumbered, current nursing license from the state of employment; license must be kept current throughout the program
- Completed application

Registered Nurse to Master of Science in Nursing Online

The RN-MSN online program at Spring Arbor University allows you to continue to practice while working towards a position of nurse educator, nurse administrator or nurse practitioner. Delivered online, this program allows you to earn your MSN for less money and in less time than it would take if you were to pursue your BSN first.

The ANA Standards and Scope of Nursing Practice and Ethical Code for Nurses are examined as well as professional associations and practice regulating bodies. The course explores the role of nursing theory to guide practice. The formal literature review process and the value of evidence-based practice (EBP) are introduced. E-portfolios are introduced as a method of documenting academic progress and professional development. The course provides foundational professional concepts in legal, ethical, and patient-centered care in preparation for future courses across the educational continuum and roles in advanced practice nursing.
- **NUR341 Patient Centered Care I**

This course has a gerontology focus that utilizes the principles and techniques of holistic nursing assessment and care planning guided by evidence-based interventions and nursing theory. How an aging population affects the health care system and nursing practice are explored. Nursing assessment incorporates review of systems, health promotion, preventative care need, and palliative care planning.
- **NUR452 Evidence Based Practice I**

Three (1) credit components will be taken concurrently with carousel courses.

These one-credit component/modules are designed to guide the baccalaureate student to identify practice issues, appraise and integrate evidence, and evaluate outcomes. The e-portfolio is used as a tool to document competencies, track academic progression through the six EBP components, and document academic preparation as students navigate the Capstone project.

**Not required for Education track.*

RN to MSN Curriculum Descriptions – Core Courses

1. The student will learn the value of evidence-based practice (EBP), the use of EBP to support quality and safety measures in practice, and models for applying evidence to clinical practice. The concept of the Senior Project is introduced. Students identify educational need in practice or a patient safety issue and then search the databases to begin a literature review to gather evidence to support that issue for their Senior Project. Students learn the basic steps of the Excel spreadsheet to document their ongoing literature review.
2. The student is introduced to the basic elements and concepts of statistics and the use of statistical data in nursing research studies. The students continue to define their chosen practice or educational topic for the Senior Project and continue the literature review. Excel instruction progresses during this component to build on the skills obtained in the first component
3. The student learns the value of research, implications for practice, and the steps of the research process. Ethical issues and the advocacy role of the nurse in protecting the rights of human subjects are recognized. Students learn how bias can influence the design and the implications are explored. The course stimulates critical thinking through locating, evaluating, and critiquing research studies and provides the opportunity to develop a practicum proposal based on scientific research and evidence-based practice. The literature review process continues throughout the course with a written proposal for the Senior Project submitted at the end of Component 452.c.

■ **IDS300 Biblical Perspectives**

As a Christian liberal arts university, Spring Arbor University is committed to nurturing an appreciation for the resources of the Scriptures for creative personal faith and human life in the modern world. This course is designed to foster knowledge and understanding of the literature and history of the Bible and integration of faith, living, and learning.

■ **NUR360 Information Management/Patient Care Technologies**

This course emphasizes the use of technology and information systems for clinical decision-making. Students learn the skills necessary to use information management and patient care technologies to deliver safe and effective care. The course explores quality improvement information systems that monitor patient outcomes and required regulatory reporting. Ethical and legal issues related to the use of IT, including copyright, privacy, and confidentiality issues are investigated.

■ **NUR442 Patient Centered Care II**

Evidence-based health techniques for disease prevention, health promotion, and self-management of chronic conditions are investigated. Younger adult assessment and health history interview techniques are explored. The assessment findings are used to formulate a holistic, culturally sensitive health promotion plan and apply a theory as a basis for care. The course focuses on effective communication in facilitating client movement toward health and wellness.

■ **NUR344 Clinical Prevention/ Population Health**

The course discusses theory and concepts of community/public/global health including health care systems in transition, health policy, and epidemiology. The Public Health/Community Health Nurse's (PH/CHN) role as partner with the community in health promotion, disease and injury prevention, and population health is applied to patient scenarios. Students utilize teaching, learning, and behavioral change theories and concepts to plan care.

■ **NUR453 Evidence Based Practice**

Three (1) credit components will be taken concurrently with carousel courses.

1. Reviewing the basic elements and concepts of the research process including levels of measurement, measurement tools, data presentation and descriptive statistics.

RN to MSN Curriculum Descriptions – Core Courses

2. Students learn to use Excel for statistical equations in preparation for the utilization of nursing research and using data to make evidence-based changes in practice. Integration of the most widely used statistical methods and the use of Excel promotes deeper understanding within the context of health care research and evidence-based nursing practice.

3. Additional concepts of statistical analysis and major epidemiological study designs are explored. Statistical concepts are applied to evidence-based nursing practice.

■ **NUR434 Quality Leadership**

This course focuses on the professional nurse's role in applying the principles of leadership and management to navigate systems in healthcare organizations across the continuum of care. The course explores the nurse leader's role in quality and safety, the regulatory environment, policy, and advocacy for EBP. The course provides opportunities to improve critical reasoning, interdisciplinary communication techniques, and conflict resolution. Change management and conflict resolution theories are utilized in practice situations.

■ **NUR494 Senior Nursing Project**

This course provides the student with the practical experience of applying and integrating the concepts and theories learned so far in the program to a setting (community or clinical). Students assess and identify a patient safety or care process problem, a practice discrepancy, or an educational need that is supported by research through a comprehensive literature review. Using the nursing process, student's design and implement their project and the BSN portion of the program culminates with a project presentation to faculty, peers, and interested parties.

■ **IDS400 Values: Personal and Social**

This is a capstone course in which the student formulates a philosophy of life providing the base for such concerns as professional ethics, accountability in government and nursing practice, respect for human rights, and a responsible lifestyle in our contemporary world. Ethical theories and personal values are examined through readings, analysis of issues and classroom discussion.

■ **NUR510 Moral & Ethical Decision Making**

This course provides a meta-cognitive foundational approach to advanced nursing practice in the contemporary world. It explores worldview presuppositions with an emphasis on a Christian perspective and development of a consistent, conscious understanding of reality.

■ **NUR522 Theoretical Perspectives for Advanced Practice**

This course promotes examination, analysis and synthesis of a variety of conceptual frameworks, models and theories that provide a foundation for research and applied practice in the areas of nursing, business and education. Philosophical ideation, beliefs, scope and assumptions of select theories and models will be explored.

■ **NUR532 Organizational & Systems Leadership**

The focus is on understanding the professional role of the advanced practice nurse. The processes associated with role development, socialization and effective collaboration with diverse interdisciplinary partnerships will be examined.

■ **NUR551 Applied Research Methods**

This course focuses on the significance of research to the development of a profession and the practical application of statistics to evidence-based outcomes. Emphasis will be placed on design, methodology and data collection relative to development of a research-based capstone project or thesis.

■ **NUR612 Advanced Pathophysiology**

This course provides advanced knowledge and clinical application of normal and pathophysiologic mechanisms related to altered health status and disease processes. Diagnosis and treatment skills will be analyzed, interpreted and evaluated for changes in normal function seen during illness/disease and when assessing an individual's response to treatment.

■ **NUR618 Advanced Pharmacology**

This course will provide the advanced practice nurse with the knowledge and skills necessary to assess, diagnose and manage pharmacologic agents, alternatives to pharmacological interventions and therapeutic modalities. Prescriptive authority, including responsibilities and

RN to MSN Curriculum Descriptions – Core Courses

legalities, will be discussed, including controlled substances and the potential for abuse.

■ **NUR602 Advanced Health Assessment (residency)***

This practicum will prepare students with the core knowledge and competencies needed to complete a comprehensive assessment using client data to detect signs and symptoms of pathophysiological changes and psychosocial variation from an individual, family or community perspective. Effective strategies will be developed to address health care issues, including health promotion, communication and client-teaching skills using a holistic approach. The practicum will provide clinical opportunities to further refine and practice the history taking and physical examination skills necessary for competence as an advanced practice nurse.

The Nursing Department reserves the right to change curriculum requirements based on professional or accreditation recommendations.

PLEASE NOTE - PSY351 Statistics for Behavioral Sciences is also required FOR ALL MSN programs (if student has not taken a comparable statistics course, this is required to be taken during the MSN program. The student is notified of this upon acceptance into the program.)

**Not required for Education track.*

Registered Nurse to Master of Science in Nursing/Education Online Curriculum

RN to MSN/Education Courses

- NUR620 Advanced Health Assessment for Nurse Educators (2)
- NUR625 - Educational Theory & Curriculum Design (3)
- NUR635 - Instructional Strategies (3)
- NUR655 Special Topics Elective (1)
- NUR660 Nurse Educator Internship (6)

RN to MSN Curriculum Descriptions – Core Courses

■ **NUR620 Advanced Health Assessment for Nurse Educators**

This course focuses on advanced skills in health assessment and prepares the nurse educator to teach these skills to BSN and/or ADN nursing students. The course also emphasizes comprehensive history, physical/psychological assessment, pathophysiology, and health promotion needs assessment.

■ **NUR625 Educational Theory & Curriculum Design**

This course utilizes learning theories to design a teaching/learning project. Strategic planning steps such as needs assessment, behavioral objectives, instructional design, and delivery for non-traditional learners will be explored.

■ **NUR635 Instructional Strategies**

Students will delve into the selection and application of instructional strategies for traditional and online learning environments. A variety of approaches for learning experiences in higher education, professional/staff development, and community programs for individuals or groups will be used.

■ **NUR655 Special Topics Elective**

Special topics of interest to the nurse-educator will be presented in this course. The topics will vary by semester at the discretion of the nursing department.

■ **NUR660 Nurse Educator Internship**

This course provides individually supervised field experience in clinical settings that integrate concepts in nursing education with practical teaching situations. Students will also design an evidence-based project based on their practice setting. *Prerequisites: NUR 625 and NUR 635*

RN to MSN/MBA Curriculum Descriptions – MBA Core Courses

■ **MBA 060 MBA Orientation**

Introduces students to Spring Arbor University and the Gainey School of Business MBA program. Familiarizes students with the Blackboard learning management system that supports learning through electronic access to learning materials from virtually anywhere, connects the learning community, and promotes collaboration. Students practice using Blackboard tools, interact with peers, monitor course progress and grades, and obtain feedback from an instructor through Blackboard.

■ **MBA 617 Leadership in Business**

Introduces students to leadership in business administration as a foundation for effective management of the organization. Explores leadership from the perspective of the practicing manager and focuses on individual, group, and organizational leadership. Covers the nature of leadership, leading change, leadership effectiveness, leadership development, and traditional and emerging leadership theories. Special emphasis is placed upon self-leadership and professional leadership assessment of personal strengths and weaknesses in handling specific managerial issues and responsibilities.

RN to MSN/MBA Curriculum Descriptions – MBA Core Courses

■ **MBA631 Accounting for Managers**

Introduces students to the fundamental concepts and principles of accounting as a discipline to support managerial decision making in businesses. Examines the use of information for data driven decision making, including organizational level performance measurements. Covers financial ratio calculations and analysis, preparation of financial statements, taxes, accounting liquidity, contribution margin, budgeting, and auditing issues.

■ **MBA622 Statistics for Business Managers**

Introduces students to data driven decision making using a statistical thinking framework. Emphasis placed upon the use of statistical data for identifying, understanding, interpreting, and solving business scenarios and issues. Develops skills necessary to identify business problems, collect data following appropriate protocols and methods, and analyze data using statistical techniques.

■ **MBA661 Marketing for Managers**

Introduces the principles of service and stewardship through marketing management. Focuses on developing an understanding of the role of markets and marketing from an economic thinking perspective including an analysis of product markets and developing marketing strategies that will provide sustainable competitive advantage. Special emphasis is placed upon the integration of concepts, principles, and techniques of marketing through application within client organizations. Topics include: customer value and satisfaction, market research and surveys, marketing segmentation differentiation, positioning, and the development and execution of marketing plans.

■ **MBA607 International Business (including NYC trip)**

Introduces key aspects of contemporary international business management and implications of international business on organizational strategy, structure, and function. Coverage includes ethics in business, country differences, trade and investments, global monetary systems, and competition in a global marketplace. Topics include Poverty Cure, human rights, global human resource development, conference environment papers, and group presentations. As a part of the MBA607 courses, students attend an International Business Summit as part of a four-day trip to New York City. The university covers the costs of accommodations (i.e., hotel, food) to participate in the summit. Students are responsible for travel arrangements and expenses.

– or –

■ **MBA607A International Business (no NYC trip option)**

Introduces key aspects of contemporary international business management and implications of international business on organizational strategy, structure, and function. Coverage includes ethics in business, country differences, trade and investments, global monetary systems, and competition in a global marketplace. Topics include Poverty Cure, human rights, global human resource development, and conference environment individual presentations, peer reviews, and critiques.

■ **MBA688 MBA Capstone Study**

The MBA capstone experience emphasizes the integration and application of acquired knowledge and skills from the MBA core and concentration curriculum. Focuses on the identification of a group/work unit/team or organizational level issue, problem, or opportunity, as well as the proposed solution to improve organizational performance. Students will conduct an organizational assessment, review of the literature, explain the issues using appropriate concepts and theories, create a proposal to address the problem, and develop a final business consultancy report and presentation. The student works with a real organization/client, and the client provides an assessment of the student's performance and contribution to the organization.

RN-MSN/MBA | Healthcare Administration Concentration Curriculum

Develops management knowledge and skills necessary for healthcare professionals and builds business acumen required for effective healthcare leadership. The concentration courses focus on the complexities and trends in the healthcare industry by focusing on contemporary issues in healthcare administration, policy, economics, quality, and strategy in healthcare management.

- **MBA641 Trends in Healthcare Administration & Management**

Addresses contemporary issues in the field of healthcare and the factors influencing the structure, delivery, and financing within health care systems. Examines the roles of various health care institutions and professional groups providing health services. Covers emerging trends that impact healthcare in the U.S. as well as the leadership challenges associated with healthcare administration. Special emphasis on making informed decisions related to healthcare administration and management topics that concern modern healthcare administrators.

- **MBA642 Managerial Finance in Healthcare**

Examines the fundamentals of financial management in the healthcare sectors. Prepares non-financial healthcare professionals with skills necessary to manage and control costs while simultaneously investing resources in strategic opportunities. Focuses on the use of financial analysis techniques, financial reasoning, and financial tools for effective decision making and planning in a healthcare setting. Special emphasis on financial liquidity, solvency, and measuring efficiency of healthcare organizations using key ratio information.

- **MBA643 Managing Quality in Healthcare**

Identifies the principles of quality improvement necessary for creating a quality culture in healthcare. Examines tools and methods of planning and implementing quality improvement initiatives in healthcare. Addresses both clinical improvements related to the delivery of quality patient care and process improvements related to the processes necessary in supporting the delivery of quality patient care. Special emphasis on methodology for improving quality in healthcare organizations, process improvement tools and measurement systems, Six Sigma, lean management techniques, and medical informatics.

RN-MSN/MBA | Human Resource Development Concentration Curriculum

Develops knowledge and skills necessary to leverage organizational human resources to improve individual performance and enhance organizational effectiveness. Strengthens skills in problem solving, strategic thinking, and critical analysis necessary for identifying and solving human related issues within an organization. Prepares students to promote employee and organizational growth through individual and organizational learning.

- **MBA647 Workplace Learning and Professional Development**

Explores the major issues relevant to workplace learning and development. Develops skills in needs analysis, learning and development methods, method selection, development plans, and assessment. Covers adult learning theory, knowledge, and development. Emphasizes principles of traditional and contemporary approaches to workplace learning and development in organizations. Special emphasis on the practical application of learning development methods and assessments to ascertain factors influencing effective workplace learning strategies.

- **MBA648 Human Resource Development**

Explores major issues of managing human resources. Develops skills in assessing human resource needs for career development and organizational effectiveness. Covers principles of adult learning through designing practical applications in diverse work settings. Special emphasis on current topics in the field of human resource development, including the assessment, design, implementation, and evaluation of HRD programs; personal, professional, and organizational development; and application of HRD in diverse contexts. Various types of training programs will be examined, including onboarding, skills and technical, performance management, employee wellness, career management, organization and management development, and diversity.

- **MGT651 Management of Organizational Behavior**

Introduction to the management of behavior in organizations, the field of industrial and organizational psychology, and various aspects of people in the workplace. Covers issues related to employee development through training and learning, employee productivity, well-being, attitudes, behaviors, motivation, and leadership. Explores principles of organizational behavior and management such as how people work, where they work, and how the workplace operates. Emphasizes the complexity of organizational functioning and importance of the management of organizational behavior.

RN-MSN/MBA | Management Concentration Curriculum

Develops skills necessary for effective traditional management in organizations. The concentration is designed for individuals interested in strengthening traditional business administration and management knowledge and skills.

- **MBA654 Strategic Planning & Management**

Introduces the concepts of strategic planning and management, and considers the vision, mission, and goals of the organization. Provides students with a framework for conducting strategic planning in the organizational environment. Examines the balanced scorecard approach to strategic planning and management for translating strategy to action. Special emphasis is placed upon the cyclical development of pertinent information necessary for strategic planning and management.

- **MBA648 Human Resource Development**

Explores major issues of managing human resources. Develops skills in assessing human resource needs for career development and organizational effectiveness. Covers principles of adult learning through designing practical applications in diverse work settings. Special emphasis on current topics in the field of human resource development, including the assessment, design, implementation, and evaluation of HRD programs; personal, professional, and organizational development; and application of HRD in diverse contexts. Various types of training programs will be examined, including onboarding, skills and technical, performance management, employee wellness, career management, organization and management development, and diversity.

- **MBA651 Management of Organizational Behavior**

Introduction to the management of behavior in organizations, the field of industrial and organizational psychology, and various aspects of people in the workplace. Covers issues related to employee development through training and learning, employee productivity, well-being, attitudes, behaviors, motivation, and leadership. Explores principles of organizational behavior and management such as how people work, where they work, and how the workplace operates. Emphasizes the complexity of organizational functioning and importance of the management of organizational behavior.

RN-MSN/MBA | Organizational Consulting Concentration Curriculum

Develops a strong foundation in assessing, researching, and finding possible solutions to personnel, group/team/work unit, and organizational problems. Develops requisite skills necessary for understanding, predicting, and influencing individual and group behavior in organizations as the foundation for leading effective organizational development and change initiatives. Organizational consultants apply behavioral science and organizational leadership principles in the work context to positively influence individuals, groups, and organizations.

- **MBA647 Workplace Learning and Professional Development**

Explores the major issues relevant to workplace learning and development. Develops skills in needs analysis, learning and development methods, method selection, development plans, and assessment. Covers adult learning theory, knowledge, and development. Emphasizes principles of traditional and contemporary approaches to workplace learning and development in organizations. Special emphasis on the practical application of learning development methods and assessments to ascertain factors influencing effective workplace learning strategies.

- **MBA657 Strategic Leadership**

Examines characteristics and skills that allow leaders to make positive and strategic contributions to their organizations. Focuses on the development of strategic leadership skills including the development of strategic thinking and strategic actions for superior organizational performance. Emphasizes the analysis of leader traits, skills, styles, and characteristics, and the influence on the strategic leadership of organizations.

- **MBA658 Organizational Consulting**

Examination of best consulting practices for internal and external change agents. In-depth exploration and practice on contracting, assessment and diagnosis, data collection, feedback techniques, implementation of planned change initiatives, resistance to change, and other psychodynamics in the organization related to change. Emphasizes the collaborative consulting approach and the collaborative consulting cycle as well as change management models and effective change management consulting techniques.

RN-MSN/MBA | Executive Leadership Concentration Curriculum

Prepares business professionals to predict and influence individual and group behavior through strategic leadership. The concentration is designed for organizational professionals already proficient in administrative management. Broadens knowledge and skills through strategic leadership, strategic planning, and advanced management focus.

- **MBA657 Strategic Leadership**

Examines characteristics and skills that allow leaders to make positive and strategic contributions to their organizations. Focuses on the development of strategic leadership skills including the development of strategic thinking and strategic actions for superior organizational performance. Emphasizes the analysis of leader traits, skills, styles, and characteristics and the influence on the strategic leadership of organizations.

- **MBA654 Strategic Planning & Management**

Introduces the concepts of strategic planning and management, and considers the vision, mission, and goals of the organization. Provides students with a framework for conducting strategic planning in the organizational environment. Examines the balanced scorecard approach to strategic planning and management for translating strategy to action. Special emphasis is placed upon the cyclical development of pertinent information necessary for strategic planning and management.

- **MBA651 Management of Organizational Behavior**

Introduction to the management of behavior in organizations, the field of industrial and organizational psychology, and various aspects of people in the workplace. Covers issues related to employee development through training and learning, employee productivity, well-being, attitudes, behaviors, motivation, and leadership. Explores principles of organizational behavior and management such as how people work, where they work, and how the workplace operates. Emphasizes the complexity of organizational functioning and importance of the management of organizational behavior.

Registered Nurse to Master of Science in Nursing/ Nurse Practitioner Online Curriculum

RN to MSN/NP Additional Core Courses

- NUR685 Advanced Practice in Primary Care I (3)
- NUR686 Advanced Practice in Primary Care II (3)
- NUR680 Clinical Practicum (8-10)
- NUR681 Capstone Project (3)

Family Nurse Practitioner Track

- NUR633 Health Promotion Across the Lifespan (3)
- NUR645 Family Systems and Clinical Management of the Child Bearing Family (3)
- NUR687 Advanced Practice in Primary Care II (3)

Adult Gerontology, Primary Care Nurse Practitioner Track

- NUR632 Health Promotion & Disease Prevention (3)
- NUR642 Chronic Disease and Complex Problems in Older Adults (3)

RN to MSN/NP Curriculum Descriptions – Additional Core Courses

■ **NUR685 Advanced Practice in Primary Care I**

This course will present critical concepts the advanced practice nurse can use in delivering evidence-based nursing for the adult population. Using a holistic approach, students will apply theory to practice.

■ **NUR686 Advanced Practice in Primary Care II**

This course prepares students with the skills to function as an advanced practice nurse in addressing chronic and complex alterations in health experienced by the older adult. Gerontology concepts will be applied in meeting the biological, psychosocial, mental, and spiritual needs of the older adult. Students will combine history taking, physical examination techniques, and diagnostic interpretation with problem-solving and clinical strategies.

■ **NUR680 Clinical Practicum**

The clinical practicum is arranged with a local preceptor with the approval of the program faculty. Students have regular contact with SAU clinical faculty, who also provide oversight of the preceptor-led experience. In the Adult Gerontology concentration, the minimum is 500 hours; however, students taking the Family Nurse Practitioner track have an additional two credits, equating to a total of 625 clinical hours.

■ **NUR681 Capstone Project**

Students will examine the evidence base for resolving a current health problem, design and implement a project that applies the evidence-based treatment/solution, and evaluate the change that occurs in the target group. This project is not designed as a thesis but an application of concepts and learning throughout the graduate program.

RN to MSN/Family Nurse Practitioner Track Curriculum Descriptions

■ **NUR633 Health Promotion across the Lifespan**

This course prepares the advanced practice nurse (APN) to apply theoretical and current research concerning health promotion and disease prevention to clinical practices, individuals, families, communities and special populations, all from a Christian perspective. Students will explore the transformative effect of compassion and caring in facilitating healthful behavior changes and will learn to apply culturally appropriate communication skills adapted to the individual's cognitive, developmental, physical, mental and behavioral health status. A review of the patterns and variations of human growth and development will inform the student's exploration of the impact of the family on the health of individuals across their lifespan. Evidence-based, health-promoting strategies and modalities will be analyzed. Students will apply the knowledge, skills and competencies essential to the promotion and maintenance of health, both as independent providers and within a multidisciplinary team.

■ **NUR645 Family Systems and Clinical Management of the Childbearing Family**

This course prepares the family nurse practitioner-student to examine evidence-based principles of nursing care in the context of family and nursing theory, and to apply this knowledge to clinical practice within diverse family systems, all from a Christian perspective. Students will consider and apply the knowledge, skills and competencies essential to the holistic management of child-bearing women and their families, both as independent providers and within a multidisciplinary team. Students will focus on the care of healthy antepartum women and those with health pattern variations that may result in at-risk pregnancies. Emphasis is placed on collaborative management of women and families during pregnancy. Concepts focused on promoting well-being will be explored, with an emphasis on family interventions that promote resiliency as well as the health and well-being of the family.

■ **NUR687 Advanced Practice in Primary Care of the Child**

This course prepares the family nurse practitioner to provide evidence-based, primary health care to infants and children, all from a Christian perspective. Using a holistic approach, students examine the scientific basis of common health problems and factors influencing nursing management of these problems. Relevant nursing interventions for common health problems of children in families are explored, as are the responses and adaptations of the child and family to common health problems. Students will consider and apply the knowledge, skills and competencies essential to the holistic management of children and families, both as independent providers and within a multidisciplinary team. Students will combine history taking, physical examination techniques and diagnostic interpretation with problem-solving and clinical strategies.

RN to MSN/Adult-Gerontology Track Curriculum Descriptions

- **NUR632 Health Promotion & Disease Prevention**

This course is designed to prepare the student to apply evidence-based principles of wellness, disease prevention, and health risk in individuals, families, communities, and aggregate/clinical populations. Diversity is examined relative to social and communication patterns, roles, and value/beliefs underlying health-illness behaviors.

- **NUR642 Chronic Disease and Complex Problems in Older Adults**

The focus of this course is on management of chronic disease and complex care needs of older adults. Emphasis will be on case management and interdisciplinary collaboration to arrange and evaluate care for the most health compromised clients.

RN-MSN Online Admission Requirements

- BSN degree from a program accredited by the National League for Nursing Accrediting Commission (NLNAC) or the Commission on Collegiate Nursing Education (CCNE)
- Official transcripts from all institutions of higher education attended
- A 3.0 GPA calculated from the most recent 60 academic credits
- An unrestricted, unencumbered, current nursing license from the state of employment; license must be kept current throughout the program
- Two letters of recommendation
- A two-page goal statement that explains your rationale for pursuing a graduate nursing degree
- Completed application

Practicum/Clinical Requirements

- At least six months experience working as a registered nurse preferred
- Provide evidence of current professional malpractice insurance; minimum \$1 to \$3 million prior to Senior Nursing Project
- Compliance with all institutional requirements prior to Senior Nursing Project
- CPR/BLS certification as required, proof of TB testing, any required immunizations, HIPAA training, and any additional requirements
- An internship is required for this program. Convicted felons may be limited to the type of location or client population in which their internships may be conducted*.

**The Joint Commission on Accreditation of Health Care Organizations (JCAHO) institutes regulations in order for hospitals, home health agencies, clinics and so forth to gain or maintain accreditation status. One of these regulations requires that "all persons who are involved in patient care activities - i.e., employees, volunteers and students - must have criminal background checks as well as other health care related checks." Criminal background checks must be initiated by the student and completed prior to beginning any clinically related practicums. See general graduate catalog policy.*

Master of Science in Nursing Online

The Master of Science in Nursing (MSN) online program, offered through the School of Graduate and Professional Studies and SAU Online, prepares students to further their professional career as an educator, administrator or advanced nurse practitioner in either adult/gerontology or family practice. The online MSN program incorporates nursing-specific knowledge with skills and knowledge in a manner that promotes excellence in service, a passion for nursing as a profession and compassionate care.

MSN/Education:

- Total Credit Hours: 39
- Tuition per Credit: \$725
- Total Tuition: \$28,275

MSN/MBA:

- Total Credit Hours: 63
- Tuition per Credit: \$725
- Total Tuition: \$45,675

MSN/Family Nurse Practitioner:

MSN Curriculum Descriptions – Core Courses

- **NUR510 Moral & Ethical Decision Making (residency)**

This course provides a meta-cognitive foundational approach to advanced nursing practice in the contemporary world. It explores worldview presuppositions with an emphasis on a Christian perspective and development of a consistent, conscious understanding of reality.
- **NUR522 Theoretical Perspectives for Advanced Practice**

This course promotes examination, analysis and synthesis of a variety of conceptual frameworks, models and theories that provide a foundation for research and applied practice in the areas of nursing, business and education. Philosophical ideation, beliefs, scope and assumptions of select theories and models will be explored.
- **NUR532 Role Development & Leadership**

The focus is on understanding the professional role of the advanced practice nurse. The processes associated with role development, socialization and effective collaboration with diverse interdisciplinary partnerships will be examined.
- **NUR551 Applied Research Methods**

This course focuses on the significance of research to the development of a profession and the practical application of statistics to evidence-based outcomes. Emphasis will be placed on design, methodology and data collection relative to development of a research-based capstone project or thesis.
- **NUR612 Advanced Pathophysiology**

This course provides advanced knowledge and clinical application of normal and pathophysiologic mechanisms related to altered health status and disease processes. Diagnosis and treatment skills will be analyzed, interpreted and evaluated for changes in normal function seen during illness/disease and when assessing an individual's response to treatment.
- **NUR618 Advanced Pharmacology**

This course will provide the advanced practice nurse with the knowledge and skills necessary to assess, diagnose and manage pharmacologic agents, alternatives to pharmacological interventions and therapeutic modalities. Prescriptive authority, including responsibilities and legalities, will be discussed, including controlled substances and the potential for abuse.
- **NUR602 Advanced Health Assessment (residency)**

This practicum will prepare students with the core knowledge and competencies needed to complete a comprehensive assessment using client data to detect signs and symptoms of pathophysiological changes and psychosocial variation from an individual, family or community perspective. Effective strategies will be developed to address health care issues, including health promotion, communication and client-teaching skills using a holistic approach. The practicum will provide clinical opportunities to further refine and practice the history taking and physical examination skills necessary for competence as an advanced practice nurse.

MSN Curriculum Descriptions – Core Courses

■ **NUR683 Health Policy**

The focus is on the knowledge of professional responsibility to support policy issues associated with humane health care that promotes dignity, respect and justice. Practical skills such as working with the media, product and service evaluation, advocating for the health care needs of vulnerable populations, and seeking program grants will be addressed.

■ **NUR693 Population Health**

The focus of this course is on integrating the learning from previous courses to design treatment and evaluate outcomes for the most vulnerable groups, particularly the systems of care that manage services for frail elderly, the chronically ill, and other similarly compromised patients.

Master of Science in Nursing/Education Online Curriculum

MSN/Education Courses

- NUR620 Advanced Health Assessment for Nurse Educators
- NUR625 Educational Theory & Curriculum Design (3)
- NUR635 Instructional Strategies (3)
- NUR655 Special Topics Elective
- NUR660 Nurse Educator Internship

MSN/Ed Curriculum Descriptions

■ **NUR620 Advanced Health Assessment for Nurse Educators**

This course focuses on advanced skills in health assessment that prepare the nurse educator to teach these skills to BSN and/or ADN nursing students.

The course also emphasizes comprehensive history, physical/psychological assessment, pathophysiology, and health promotion needs assessment.

■ **NUR625 Educational Theory & Curriculum Design**

This course utilizes learning theories to design a teaching/learning project. Strategic planning steps such as needs assessment, behavioral objectives, instructional design, and delivery for non-traditional learners will be explored.

■ **NUR635 Instructional Strategies**

Students will delve into the selection and application of instructional strategies for traditional and online learning environments. A variety of approaches for learning experiences in higher education, professional/staff development, and community programs for individuals or groups will be used.

■ **NUR655 Special Topics Elective**

Special topics of interest to the nurse-educator will be presented in this course. The topics will vary by semester at the discretion of the nursing department.

■ **NUR660 Nurse Educator Internship**

This course provides individually supervised field experience in clinical settings that integrate concepts in nursing education with practical teaching situations. Students will also design an evidence-based project based on their practice setting. *Prerequisites: NUR 625 and NUR 635*

Master of Science in Nursing/MBA Online Curriculum

MSN/MBA Core Courses

- MBA060 MBA Orientation (0)
- MBA617 Leadership in Business (4)
- MBA631 Accounting for Managers (4)
- MBA622 Statistics for Business Managers (4)
- MBA661 Marketing for Managers (4)
- MBA607 International Business (NYC trip) (4) or
- MBA607A International Business (no trip) (4)
- MBA688 MBA Capstone Study (4)

MSN/MBA Curriculum Descriptions

■ MBA060 MBA Orientation

Introduces students to Spring Arbor University and the Gainey School of Business MBA program. Familiarizes students with the Blackboard learning management system that supports learning through electronic access to learning materials from virtually anywhere, connects the learning community, and promotes collaboration. Students practice using Blackboard tools, interact with peers, monitor course progress and grades, and obtain feedback from an instructor through Blackboard.

■ MBA617 Leadership in Business

Introduces students to leadership in business administration as a foundation for effective management of the organization. Explores leadership from the perspective of the practicing manager and focuses on individual, group, and organizational leadership. Covers the nature of leadership, leading change, leadership effectiveness, leadership development, and traditional and emerging leadership theories. Special emphasis is placed upon self-leadership and professional leadership assessment of personal strengths and weaknesses in handling specific managerial issues and responsibilities.

■ MBA631 Accounting for Managers

Introduces students to the fundamental concepts and principles of accounting as a discipline to support managerial decision making in businesses. Examines the use of information for data-driven decision making, including organizational level performance measurements. Covers financial ratio calculations and analysis, preparation of financial statements, taxes, accounting liquidity, contribution margin, budgeting, and auditing issues.

■ MBA622 Statistics for Business Managers

Introduces students to data driven decision making using a statistical thinking framework. Emphasis placed upon the use of statistical data for identifying, understanding, interpreting, and solving business scenarios and issues. Develops skills necessary to identify business problems, collect data following appropriate protocols and methods, and analyze data using statistical techniques.

■ MBA661 Marketing for Managers

Introduces the principles of service and stewardship through marketing management. Focuses on developing an understanding of the role of markets and marketing from an economic thinking perspective including an analysis of product markets and developing marketing strategies that will provide sustainable competitive advantage. Special emphasis is placed upon the integration of concepts, principles, and techniques of marketing through application within client organizations. Topics include: customer value and satisfaction, market research and surveys, marketing segmentation differentiation, positioning, and the development and execution of marketing plans.

MSN/MBA Curriculum Descriptions

■ **MBA607 International Business (NYC trip)**

Introduces key aspects of contemporary international business management and implications of international business on organizational strategy, structure, and function. Coverage includes ethics in business, country differences, trade and investments, global monetary systems, and competition in a global marketplace. Topics include Poverty Cure, human rights, global human resource development, conference environment papers, and group presentations. As a part of the MBA607 course, students attend an International Business Summit as part of a four-day trip to New York City. The university covers the costs of accommodations (i.e., hotel, food) to participate in the summit. Students are responsible for travel arrangements and expenses.

– or –

■ **MBA607A International Business (no trip)**

Introduces key aspects of contemporary international business management and implications of international business on organizational strategy, structure, and function. Coverage includes ethics in business, country differences, trade and investments, global monetary systems, and competition in a global marketplace. Topics include Poverty Cure, human rights, global human resource development, and conference environment individual presentations, peer reviews, and critiques. Faculty who provide oversight, guidance, and assessment on the applied research project.

■ **MBA688 MBA Capstone Study**

The MBA capstone experience emphasizes the integration and application of acquired knowledge and skills from the MBA core and concentration curriculum. Focuses on the identification of a group/work unit/team or organizational level issue, problem, or opportunity, as well as the proposed solution to improve organizational performance. Students will conduct an organizational assessment, review of the literature, explain the issues using appropriate concepts and theories, create a proposal to address the problem, and develop a final business consultancy report and presentation. The student works with a real organization/client, and the client provides an assessment of the student's performance and contribution to the organization.

MSN/MBA | Healthcare Administration Concentration Curriculum

Develops management knowledge and skills necessary for healthcare professionals and builds business acumen required for effective healthcare leadership. The concentration courses focus on the complexities and trends in the healthcare industry by focusing on contemporary issues in healthcare administration, policy, economics, quality, and strategy in healthcare management.

- **MBA641 Trends in Healthcare Administration & Management**

Addresses contemporary issues in the field of healthcare and the factors influencing the structure, delivery, and financing within health care systems. Examines the roles of various health care institutions and professional groups providing health services. Covers emerging trends that impact healthcare in the U.S. as well as the leadership challenges associated with healthcare administration. Special emphasis on making informed decisions related to healthcare administration and management topics that concern modern healthcare administrators.

- **MBA642 Managerial Finance in Healthcare**

Examines the fundamentals of financial management in the healthcare sectors. Prepares non-financial healthcare professionals with skills necessary to manage and control costs while simultaneously investing resources in strategic opportunities. Focuses on the use of financial analysis techniques, financial reasoning, and financial tools for effective decision making and planning in a healthcare setting. Special emphasis on financial liquidity, solvency, and measuring efficiency of healthcare organizations using key ratio information.

- **MBA643 Managing Quality in Healthcare**

Identifies the principles of quality improvement necessary for creating a quality culture in healthcare. Examines tools and methods of planning and implementing quality improvement initiatives in healthcare. Addresses both clinical improvements related to the delivery of quality patient care and process improvements related to the processes necessary in supporting the delivery of quality patient care. Special emphasis on methodology for improving quality in healthcare organizations, process improvement tools and measurement systems, Six Sigma, lean management techniques, and medical informatics.

MSN/MBA | Human Resource Development Concentration Curriculum

Develops knowledge and skills necessary to leverage organizational human resources to improve individual performance and enhance organizational effectiveness. Strengthens skills in problem solving, strategic thinking, and critical analysis necessary for identifying and solving human related issues within an organization. Prepares students to promote employee and organizational growth through individual and organizational learning.

- **MBA647 Workplace Learning and Professional Development**

Explores the major issues relevant to workplace learning and development. Develops skills in needs analysis, learning and development methods, method selection, development plans, and assessment. Covers adult learning theory, knowledge, and development. Emphasizes principles of traditional and contemporary approaches to workplace learning and development in organizations. Special emphasis on the practical application of learning development methods and assessments to ascertain factors influencing effective workplace learning strategies.

- **MBA648 Human Resource Development**

Explores major issues of managing human resources. Develops skills in assessing human resource needs for career development and organizational effectiveness. Covers principles of adult learning through designing practical applications in diverse work settings. Special emphasis on current topics in the field of human resource development, including the assessment, design, implementation, and evaluation of HRD programs; personal, professional, and organizational development; and application of HRD in diverse contexts. Various types of training programs will be examined, including onboarding, skills and technical, performance management, employee wellness, career management, organization and management development, and diversity.

- **MGT651 Management of Organizational Behavior**

Introduction to the management of behavior in organizations, the field of industrial and organizational psychology, and various aspects of people in the workplace. Covers issues related to employee development through training and learning, employee productivity, well-being, attitudes, behaviors, motivation, and leadership. Explores principles of organizational behavior and management such as how people work, where they work, and how the workplace operates. Emphasizes the complexity of organizational functioning and importance of the management of organizational behavior.

MSN/MBA | Management Concentration Curriculum

Develops skills necessary for effective traditional management in organizations. The concentration is designed for individuals interested in strengthening traditional business administration and management knowledge and skills.

- **MBA654 Strategic Planning & Management**

Introduces the concepts of strategic planning and management, and considers the vision, mission, and goals of the organization. Provides students with a framework for conducting strategic planning in the organizational environment. Examines the balanced scorecard approach to strategic planning and management for translating strategy to action. Special emphasis is placed upon the cyclical development of pertinent information necessary for strategic planning and management.

- **MBA648 Human Resource Development**

Explores major issues of managing human resources. Develops skills in assessing human resource needs for career development and organizational effectiveness. Covers principles of adult learning through designing practical applications in diverse work settings. Special emphasis on current topics in the field of human resource development, including the assessment, design, implementation, and evaluation of HRD programs; personal, professional, and organizational development; and application of HRD in diverse contexts. Various types of training programs will be examined, including onboarding, skills and technical, performance management, employee wellness, career management, organization and management development, and diversity.

- **MBA651 Management of Organizational Behavior**

Introduction to the management of behavior in organizations, the field of industrial and organizational psychology, and various aspects of people in the workplace. Covers issues related to employee development through training and learning, employee productivity, well-being, attitudes, behaviors, motivation, and leadership. Explores principles of organizational behavior and management such as how people work, where they work, and how the workplace operates. Emphasizes the complexity of organizational functioning and importance of the management of organizational behavior.

MSN/MBA | Organizational Consulting Concentration Curriculum

Develops a strong foundation in assessing, researching, and finding possible solutions to personnel, group/team/work unit, and organizational problems. Develops requisite skills necessary for understanding, predicting, and influencing individual and group behavior in organizations as the foundation for leading effective organizational development and change initiatives. Organizational consultants apply behavioral science and organizational leadership principles in the work context to positively influence individuals, groups, and organizations.

- **MBA647 Workplace Learning and Professional Development**

Explores the major issues relevant to workplace learning and development. Develops skills in needs analysis, learning and development methods, method selection, development plans, and assessment. Covers adult learning theory, knowledge, and development. Emphasizes principles of traditional and contemporary approaches to workplace learning and development in organizations. Special emphasis on the practical application of learning development methods and assessments to ascertain factors influencing effective workplace learning strategies.

- **MBA657 Strategic Leadership**

Examines characteristics and skills that allow leaders to make positive and strategic contributions to their organizations. Focuses on the development of strategic leadership skills including the development of strategic thinking and strategic actions for superior organizational performance. Emphasizes the analysis of leader traits, skills, styles, and characteristics, and the influence on the strategic leadership of organizations.

- **MBA658 Organizational Consulting**

Examination of best consulting practices for internal and external change agents. In-depth exploration and practice on contracting, assessment and diagnosis, data collection, feedback techniques, implementation of planned change initiatives, resistance to change, and other psychodynamics in the organization related to change. Emphasizes the collaborative consulting approach and the collaborative consulting cycle as well as change management models and effective change management consulting techniques.

MSN/MBA | Executive Leadership Concentration Curriculum

Prepares business professionals to predict and influence individual and group behavior through strategic leadership. The concentration is designed for organizational professionals already proficient in administrative management. Broadens knowledge and skills through strategic leadership, strategic planning, and advanced management focus.

- **MBA654 Strategic Planning & Management**

Introduces the concepts of strategic planning and management, and considers the vision, mission, and goals of the organization. Provides students with a framework for conducting strategic planning in the organizational environment. Examines the balanced scorecard approach to strategic planning and management for translating strategy to action. Special emphasis is placed upon the cyclical development of pertinent information necessary for strategic planning and management.

- **MBA657 Strategic Leadership**

Examines characteristics and skills that allow leaders to make positive and strategic contributions to their organizations. Focuses on the development of strategic leadership skills including the development of strategic thinking and strategic actions for superior organizational performance. Emphasizes the analysis of leader traits, skills, styles, and characteristics and the influence on the strategic leadership of organizations.

- **MBA651 Management of Organizational Behavior**

Introduction to the management of behavior in organizations, the field of industrial and organizational psychology, and various aspects of people in the workplace. Covers issues related to employee development through training and learning, employee productivity, well-being, attitudes, behaviors, motivation, and leadership. Explores principles of organizational behavior and management such as how people work, where they work, and how the workplace operates. Emphasizes the complexity of organizational functioning and importance of the management of organizational behavior.

Master of Science in Nursing/Nurse Practitioner Online Curriculum

MSN/NP Additional Core Courses

- NUR602 Advanced Health Assessment (residency) (3)
- NUR685 Advanced Practice in Primary Care I (3)
- NUR686 Advanced Practice in Primary Care II (3)
- NUR680 Clinical Practicum (8)
- NUR681 Capstone Project (3)
- NUR683 Health Policy (3)
- NUR693 Population Health (3)

Family Nurse Practitioner Track

- NUR633 Health Promotion Across the Lifespan (3)
- NUR645 Family Systems and Clinical Management of the Child Bearing Family (3)
- NUR687 Advanced Practice in Primary Care II (3)

Adult Gerontology, Primary Care Nurse Practitioner Track

- NUR632 Health Promotion & Disease Prevention (3)
- NUR642 Chronic Disease and Complex Problems in Older Adults (3)

MSN/NP Curriculum Descriptions - Additional Core Courses

■ **NUR602 Advanced Health Assessment (residency)**

This practicum will prepare students with the core knowledge and competencies needed to complete a comprehensive assessment using client data to detect signs and symptoms of pathophysiological changes and psychosocial variation from an individual, family or community perspective. Effective strategies will be developed to address health care issues, including health promotion, communication and client-teaching skills using a holistic approach. The practicum will provide clinical opportunities to further refine and practice the history taking and physical examination skills necessary for competence as an advanced practice nurse.

■ **NUR685 Advanced Practice in Primary Care I**

This course will present critical concepts the advanced practice nurse can use in delivering evidence-based nursing for the adult population. Using a holistic approach, students will apply theory to practice.

■ **NUR686 Advanced Practice in Primary Care II**

This course prepares students with the skills to function as an advanced practice nurse in addressing chronic and complex alterations in health experienced by the older adult. Gerontology concepts will be applied in meeting the biological, psychosocial, mental, and spiritual needs of the older adult. Students will combine history taking, physical examination techniques, and diagnostic interpretation with problem-solving and clinical strategies.

■ **NUR680 Clinical Practicum**

The clinical practicum is arranged with a local preceptor with the approval of the program faculty. Students have regular contact with SAU clinical faculty, who also provide oversight of the preceptor-led experience. In the Adult Gerontology concentration, the minimum is 500 hours; however, students taking the Family Nurse Practitioner track have an additional two credits, equating to a total of 625 clinical hours.

MSN/NP Curriculum Descriptions - Additional Core Courses

- **NUR681 Capstone Project**

Students will examine the evidence base for resolving a current health problem, design and implement a project that applies the evidence-based treatment/solution, and evaluate the change that occurs in the target group. This project is not designed as a thesis but an application of concepts and learning throughout the graduate program.

- **NUR683 Health Policy**

The focus of this course is on integrating the learning from previous courses to design treatment and evaluate outcomes for the most vulnerable groups, particularly the systems of care that manage services for frail elderly, the chronically ill, and other similarly compromised patients.

- **NUR693 Population Health**

The focus is on the knowledge of professional responsibility to support policy issues associated with humane health care that promotes dignity, respect and justice. Practical skills such as working with the media, product and service evaluation, advocating for the health care needs of vulnerable populations, and seeking program grants will be addressed.

MSN/Family Nurse Practitioner Track Curriculum Descriptions

■ **NUR633 Health Promotion across the Lifespan**

This course prepares the advanced practice nurse (APN) to apply theoretical and current research concerning health promotion and disease prevention to clinical practices, individuals, families, communities and special populations, all from a Christian perspective. Students will explore the transformative effect of compassion and caring in facilitating healthful behavior changes and will learn to apply culturally appropriate communication skills adapted to the individual's cognitive, developmental, physical, mental and behavioral health status. A review of the patterns and variations of human growth and development will inform the student's exploration of the impact of the family on the health of individuals across their lifespan. Evidence-based, health-promoting strategies and modalities will be analyzed. Students will apply the knowledge, skills and competencies essential to the promotion and maintenance of health, both as independent providers and within a multidisciplinary team.

■ **NUR645 Family Systems and Clinical Management of the Childbearing Family**

This course prepares the family nurse practitioner-student to examine evidence-based principles of nursing care in the context of family and nursing theory, and to apply this knowledge to clinical practice within diverse family systems, all from a Christian perspective. Students will consider and apply the knowledge, skills and competencies essential to the holistic management of child-bearing women and their families, both as independent providers and within a multidisciplinary team. Students will focus on the care of healthy antepartum women and those with health pattern variations that may result in at-risk pregnancies. Emphasis is placed on collaborative management of women and families during pregnancy. Concepts focused on promoting well-being will be explored, with an emphasis on family interventions that promote resiliency as well as the health and well-being of the family.

■ **NUR687 Advanced Practice in Primary Care of the Child**

This course prepares the family nurse practitioner to provide evidence-based, primary health care to infants and children, all from a Christian perspective. Using a holistic approach, students examine the scientific basis of common health problems and factors influencing nursing management of these problems. Relevant nursing interventions for common health problems of children in families are explored, as are the responses and adaptations of the child and family to common health problems. Students will consider and apply the knowledge, skills and competencies essential to the holistic management of children and families, both as independent providers and within a multidisciplinary team. Students will combine history taking, physical examination techniques and diagnostic interpretation with problem-solving and clinical strategies.

MSN/Adult-Gerontology, Nurse Practitioner Track Curriculum

- **NUR632 Health Promotion & Disease Prevention**

This course is designed to prepare the student to apply evidence-based principles of wellness, disease prevention, and health risk in individuals, families, communities, and aggregate/clinical populations. Diversity is examined relative to social and communication patterns, roles, and value/beliefs underlying health-illness behaviors.

- **NUR642 Chronic Disease and Complex Problems in Older Adults**

The focus of this course is on management of chronic disease and complex care needs of older adults. Emphasis will be on case management and interdisciplinary collaboration to arrange and evaluate care for the most health compromised clients.

MSN Online Admission Requirements

- BSN degree from a program accredited by the National League for Nursing Accrediting Commission (NLNAC) or the Commission on Collegiate Nursing Education (CCNE)
- Official transcripts from all institutions of higher education attended
- A 3.0 GPA calculated from the most recent 60 academic credits
- An unrestricted, unencumbered, current nursing license from the state of employment; license must be kept current throughout the program
- Two letters of recommendation
- A two-page goal statement that explains your rationale for pursuing a graduate nursing degree
- Completed application

Practicum/Clinical Requirements

- At least six months experience working as a registered nurse preferred
- Provide evidence of current professional malpractice insurance; minimum \$1 to \$3 million prior to Senior Nursing Project
- Compliance with all institutional requirements prior to Senior Nursing Project
- CPR/BLS certification as required, proof of TB testing, any required immunizations, HIPAA training, and any additional requirements
- An internship is required for this program. Convicted felons may be limited to the type of location or client population in which their internships may be conducted*.

**The Joint Commission on Accreditation of Health Care Organizations (JCAHO) institutes regulations in order for hospitals, home health agencies, clinics and so forth to gain or maintain accreditation status. One of these regulations requires that "all persons who are involved in patient care activities - i.e., employees, volunteers and students - must have criminal background checks as well as other health care related checks." Criminal background checks must be initiated by the student and completed prior to beginning any clinically related practicums. See general graduate catalog policy.*

Doctor of Nursing Practice Online

The Doctor of Nursing Practice in Strategic Leadership (DNP) online program is the highest credential a nurse can achieve. Graduates are highly sought after for positions in high level positions of authority involving clinical applications, quality improvement and contributions to healthcare policy.

The DNP online program offers options for nurses who hold an MSN, with or without an APRN certification, preparing nurses to assume a leadership role founded on integrity and faith.

DNP FOR APRNS

- Total Credit Hours: 36
- Tuition per Credit: \$812
- Total Tuition: \$29,232

DNP FOR NON-APRNS WITH MSN

- Total Credit Hours: 39
- Tuition per Credit: \$812
- Total Tuition: \$31,668

For all Programs:

- Application Fee: \$30
- Registration Fee: \$40/sem
- Technology Fee: \$105/sem
- Residency Fee: \$210
- Up-to-Date Software Fee: \$30/year
- Clinical Resource Management Fee: \$50/sem
- DNP Project Dissemination Fee: \$75

Doctor of Nursing Practice Curriculum

- NUR810 DNP Project I: Premise Development (1)
- NUR812 Principles of Science and Faith in Nursing (3)
- NUR814 Research and Analytical Methods for EBP (3)
- NUR816 Science and Theory Integration to Practice (3)
- NUR 820 DNP Project II: Proposal Development (1)
- NUR822 Translational Research in EBP (3)
- NUR 824 Informatics and Patient Care Technology to Improve Outcomes (3)
- NUR826 Clinical Prevention for Improved Global Health (3)
- NUR 830 DNP Project III: Proposal Approval and Project Implementation (2)
- NUR832 Strategic Organizational and Systems Leadership (3)
- NUR 834 Interdisciplinary Leadership for Improved Population Health (3)
- NUR836 Strategic Leadership for Quality Improvement (3)
- NUR840 DNP Project IV: Project Completion and Dissemination (2)
- NUR842 Health Care Policy, Regulation, and Financial Management (3)
- NUR880 Practicum (1) *Applies to Non-APRN Students*

DNP Curriculum Descriptions - Core Courses

- **NUR810 DNP Project I: Premise Development**

This course is designed to introduce the student to the DNP project and the knowledge and skills necessary to complete an original work of scholarship at the doctoral level. Students will develop a project premise based on a clinical or practice problem of their choice. Students will develop research questions and a problem statement, with a summary of their plans for a DNP project. Aspects of this course will be completed during the on-campus orientation. Approval for each step in the DNP project process must be obtained before moving on to the next step in the DNP project process. Each DNP Project course will run for the entire semester, concurrent with other courses in that semester.
- **NUR812 Principles of Science and Faith in Nursing**

This course offers application of the foundations of the Christian worldview to faith and science in health care. An understanding of faith as it relates to scientific principles will be explored while engaging in the development of the highest level of advanced nursing care for quality outcomes across the lifespan in diverse populations.
- **NUR814 Research and Analytical Methods for EBP**

This course provides students with an opportunity to build on master's level knowledge to synthesize and evaluate evidence at the doctoral level. Students will apply statistical and research methods for effective translation of evidence to clinical practice through critical analysis of literature, appraisal of clinical practice, and dissemination of findings.
- **NUR816 Science and Theory Integration to Practice**

In this course, students examine the scientific and theoretical underpinnings for advanced nursing practice. Students will integrate concepts from the social and natural sciences including human biology, genomics, the science of therapeutics, the psychosocial sciences, as well as the science of complex organizational structures. Philosophical, ethical, and historical issues, integral to the development of science, will be applied to assignments within the course. Students will consider how nursing theory and theories from other disciplines impact practice and the development of new knowledge to provide advances in foundational and nursing sciences.

DNP Curriculum Descriptions - Core Courses

■ **NUR 820 DNP Project II: Proposal Development**

This course provides an opportunity for students to develop a DNP project proposal for the purpose of translating and integrating evidence to change practice environments and/or the delivery of care. Students will be guided by faculty as they develop a scholarly, detailed plan to implement their original investigative study of a clinically relevant problem or question to the DNP role.

■ **NUR822 Translational Research in EBP**

This course provides an opportunity for students to apply research knowledge and skills to the translation of evidence to practice. Students will synthesize literature to solve problems and influence practice. Focus will be on ethical considerations and application of the Christian worldview with regard to healthcare research. Students will examine the leadership role as it applies to translating current evidence to practice for improvement of aggregate, systems, and organizational outcomes.

■ **NUR 824 Informatics and Patient Care Technology to Improve Outcomes**

This course prepares students to explore leadership skills used in evaluating and implementing healthcare technology. Focus will be on current healthcare technologies and their impact on health outcomes, management of individual and aggregate data, and care systems. Students will also analyze the legal and ethical implications of distance health care, web-based patient education, and other technologies to support and improve patient care.

■ **NUR826 Clinical Prevention for Improved Global Health**

Using epidemiological methodologies, students will examine the distribution and etiology of disease as they pertain to health-related conditions in resource-poor and marginalized communities. Students will investigate select global problems, such as infectious disease, bioterrorism attacks, and emergency/disaster preparedness gaining new perspectives about concepts of public health and cultural diversity and sensitivity to improve health outcomes.

■ **NUR 830 DNP Project III: Proposal Approval and Project Implementation**

In this course, students will obtain proposal approval from their DNP project committee, the SAU IRB, and IRB approval from facilities where research is being conducted, if required. Once project proposal approval has been gained, students will implement the DNP project.

■ **NUR832 Strategic Organizational and Systems Leadership**

This course provides an opportunity for students to examine operational and organizational leadership principles. Through application of organizational and systems theories, students will engage in strategic decision-making for establishing and managing healthcare environments. Focus will also be placed on providing Christ-centered leadership for quality of organization and health outcomes.

■ **NUR 834 Interdisciplinary Leadership for Improved Population Health**

This course provides a strategic view of population health management to implement evidence-based strategies for health promotion, risk reduction, and improved healthcare outcomes for diverse individuals, aggregates, and populations. Students will explore collaborative efforts with other disciplines to analyze epidemiological, biostatistical, occupational, and environmental health problems and related data. Students will apply the Christian worldview to develop leadership strategies for clinical prevention and population health services for diverse populations.

■ **NUR 836 Strategic Leadership for Quality Improvement**

This course builds on previous knowledge of organization and systems theories and provides an opportunity for students to develop quality improvement initiatives through strategic planning. Students will apply concepts from strategic planning theories, change management, strategic formation, and leadership principles to develop practice-level or system-wide initiatives to improve the quality of care delivery.

DNP Curriculum Descriptions - Core Courses

- **NUR840 DNP Project IV: Project Completion and Dissemination**

In this course students will complete the final stages of their DNP project. They will gain approval for their written report, provide an oral defense of their work, and participate in an on-campus research symposium to disseminate their scholarly work. Students will have an opportunity to prepare their projects for submission to a scholarly journal, present their work at a local or national conference, or apply other methods for further dissemination as desired.

- **NUR842 Health Care Policy, Regulation, and Financial Management**

This course prepares students to critically analyze the relationship between healthcare legislation, financial regulation, and strategic planning. Students will integrate elements of the Christian worldview to the development of healthcare policy and evaluation of healthcare resources for positive health outcomes at the institutional, local, state, regional, federal, and international levels.

- **NUR880 Practicum**

Applies to Non-APRN Students

The purpose of this course is to provide students with the opportunity to complete additional practicum hours to fulfill the 1,000-hour requirement of the DNP. This course is a faculty-led clinical immersion where students can build and assimilate knowledge for advanced practice at a high level of complexity.

DNP Online Admission Requirements

- An MSN program accredited by the National League for Nursing Accrediting Commission (NLNAC) or the Commission on Collegiate Nursing Education (CCNE)
- Official transcripts from all institutions of higher education attended
- A 3.0 GPA calculated from the most recent 60 academic credits. If GPA is below a 3.0 please include an additional document explaining your GPA
- An unrestricted, unencumbered, current nursing license from the state of employment; license must be kept current throughout the program
- Two letters of recommendation
- DNP Graduate Goal Statement:

Use the formatting guidelines established by the American Psychological Association (APA, 6th ed) for this essay (12 pt. font, 1-inch margins, double spaced, APA cover page, running header, and reference page if citations are used)

Be sure to cover the following in your Goal Statement:

- 1) If you are currently a Nurse Practitioner, please describe and provide examples of how the Doctor of Nursing Practice degree will impact your role as Nurse Practitioner. Share your understanding of strategic leadership and how you believe the specific DNP focus in strategic leadership will further enhance your practice.

If you are not a Nurse Practitioner, please describe your current role in nursing and provide examples of how a Doctor of Nursing Practice degree will impact your nursing role. Share your understanding of strategic leadership and how you believe the specific DNP focus in strategic leadership will further enhance your practice.

- 2) Graduate education is rigorous and demands a commitment of 25-30 hours a week. This commitment requires adjustments to current work/life balance. Please articulate the personal challenges you anticipate and problem-solving approaches you will implement to manage graduate school, work, and outside

- Video Introduction:

Video must be between 3 - 5 minutes covering the questions below.

- 1) What is your motivation for earning your DNP? Include both personal and professional motivations.
- 2) Knowing that completing an online graduate degree is challenging, share examples of facilitators and support systems you have in place to help you achieve success.
- 3) What current professional development activities or self-directed learning approaches do you practice (conferences, certifications, service to others, etc.)?
- 4) Getting to know you: Our goal is to break down barriers in the online learning environment. To us, students are more than a cohort number or application. To help us begin to know you better, please share one fun fact about yourself.

- Most recent professional resume
- Completed application

Post-Master's Certificates in Nursing Online

Post-Master's Certificate in Nursing (PMC) programs help MSN- or doctorally-prepared nurses build on their clinical skills and nursing knowledge. Nurses educated at the graduate level can have a broader impact on the design and implementation of healthcare.

The PMCs are designed for nurses who hold an MSN with or without APRN licensure. The programs will equip you with specialized knowledge for these in-demand advanced nursing professions including, Family Nurse Practitioner, Adult-Gerontology Primary Care Nurse Practitioner, or Nurse Educator

As a graduate, you can expand your nursing role while meeting the growing need for highly skilled nursing leaders in advanced practice nursing and nursing education.

PMC/FAMILY NURSE PRACTITIONER (NP TO FNP):

- Total Credit Hours: 11
- Tuition Per Credit: \$725
- Total Tuition: \$7,975

PMC/FAMILY NURSE PRACTITIONER (NON-NP TO FNP):

- Total Credit Hours: 23
- Tuition Per Credit: \$725
- Total Tuition: \$16,675

PMC/ADULT GERONTOLOGY (NON-NP TO AGPCNP):

- Total Credit Hours: 18
- Tuition Per Credit: \$725
- Total Tuition: \$13,050

PMC/NURSE EDUCATOR:

- Total Credit Hours: 13
- Tuition Per Credit: \$725
- Total Tuition: \$9,425

PMC/Family Nurse Practitioner (NP to FNP) Curriculum

- NUR610 Foundation for Post-Graduate Nursing
- NUR645 Family System and/Clinical Management of Child Bearing Family
- NUR687 Advanced Practice in Primary Care of the Child
- NUR680 Clinical Practicum

PMC/FNP (NP to FNP) Curriculum Descriptions

- **NUR610 Foundation for Post-Graduate Nursing**

This course explores the foundation of post-graduate education and its basis in a Biblical worldview and the SAU Concept. Students will explore the role of the advanced nurse professional and prepare for attainment of enhanced knowledge and skills for post-graduate practice.
- **NUR645 Family Systems and Clinical Management of the Childbearing Family**

This course prepares the family nurse practitioner-student to examine evidence-based principles of nursing care in the context of family and nursing theory, and to apply this knowledge to clinical practice within diverse family systems, all from a Christian perspective. Students will consider and apply the knowledge, skills and competencies essential to the holistic management of child-bearing women and their families, both as independent providers and within a multidisciplinary team. Students will focus on the care of healthy antepartum women and those with health pattern variations that may result in at-risk pregnancies. Emphasis is placed on collaborative management of women and families during pregnancy. Concepts focused on promoting well-being will be explored, with an emphasis on family interventions that promote resiliency as well as the health and well-being of the family.
- **NUR687 Advanced Practice in Primary Care of the Child**

This course prepares the family nurse practitioner to provide evidence-based, primary health care to infants and children, all from a Christian perspective. Using a holistic approach, students examine the scientific basis of common health problems and factors influencing nursing management of these problems. Relevant nursing interventions for common health problems of children in families are explored, as are the responses and adaptations of the child and family to common health problems. Students will consider and apply the knowledge, skills and competencies essential to the holistic management of children and families, both as independent providers and within a multidisciplinary team. Students will combine history taking, physical examination techniques and diagnostic interpretation with problem-solving and clinical strategies.
- **NUR680 Clinical Practicum**

The clinical practicum is arranged with a local preceptor with the approval of the program faculty. Students have regular contact with SAU clinical faculty, who also provide oversight of the preceptor-led experience. In the Adult Gerontology concentration, the minimum is 500 hours; however, students taking the Family Nurse Practitioner track have an additional two credits, equating to a total of 625 clinical hours.
- **Prerequisite Coursework:**
 - NUR612 Advanced Pathophysiology
 - NUR618 Advanced Pharmacology
 - NUR602 Advanced Health Assessment
 - NUR633 Health Promotion across the Lifespan

PMC/Family Nurse Practitioner (Non-NP to FNP) Curriculum

- NUR610 Foundation for Post-Graduate Nursing
- NUR645 Family System and/Clinical Management of Child Bearing Family
- NUR685 Advanced Practice in Primary Care I
- NUR686 Advanced Practice in Primary Care II
- NUR687 Advanced Practice in Primary Care of the Child
- NUR680 Clinical Practicum

PMC/FNP (Non-NP to FNP) Curriculum Descriptions

■ **NUR610 Foundation for Post-Graduate Nursing**

This course explores the foundation of post-graduate education and its basis in a Biblical worldview and the SAU Concept. Students will explore the role of the advanced nurse professional and prepare for attainment of enhanced knowledge and skills for post-graduate practice.

■ **NUR645 Family Systems and Clinical Management of the Childbearing Family**

This course prepares the family nurse practitioner-student to examine evidence-based principles of nursing care in the context of family and nursing theory, and to apply this knowledge to clinical practice within diverse family systems, all from a Christian perspective. Students will consider and apply the knowledge, skills and competencies essential to the holistic management of child-bearing women and their families, both as independent providers and within a multidisciplinary team. Students will focus on the care of healthy antepartum women and those with health pattern variations that may result in at-risk pregnancies. Emphasis is placed on collaborative management of women and families during pregnancy. Concepts focused on promoting well-being will be explored, with an emphasis on family interventions that promote resiliency as well as the health and well-being of the family.

■ **NUR685 Advanced Practice in Primary Care I**

This course will present critical concepts the advanced practice nurse can use in delivering evidence-based

nursing for the adult population. Using a holistic approach, students will apply theory to practice.

■ **NUR686 Advanced Practice in Primary Care II**

This course prepares students with the skills to function as an advanced practice nurse in addressing chronic and complex alterations in health experienced by the older adult. Gerontology concepts will be applied in meeting the biological, psychosocial, mental, and spiritual needs of the older adult. Students will combine history taking, physical examination techniques, and diagnostic interpretation with problem-solving and clinical strategies.

■ **NUR687 Advanced Practice in Primary Care of the Child**

This course prepares the family nurse practitioner to provide evidence-based, primary health care to infants and children, all from a Christian perspective. Using a holistic approach, students examine the scientific basis of common health problems and factors influencing nursing management of these problems. Relevant nursing interventions for common health problems of children in families are explored, as are the responses and adaptations of the child and family to common health problems. Students will consider and apply the knowledge, skills and competencies essential to the holistic management of children and families, both as independent providers and within a multidisciplinary team. NUR602 Advanced Health Assessment

NUR633 Health Promotion across the Lifespan

PMC/Adult Gerontology (Non-NP to AGPCNP) Curriculum

- NUR610 Foundation for Post-Graduate Nursing
- NUR642 Chronic Disease and Complex Problems in Older Adults
- NUR685 Advanced Practice in Primary Care I
- NUR686 Advanced Practice in Primary Care II
- NUR680 Clinical Practicum

PMC/Adult Gerontology (Non-NP to AGPCNP) Curriculum Descriptions

■ **NUR610 Foundation for Post-Graduate Nursing**

This course explores the foundation of post-graduate education and its basis in a Biblical worldview and the SAU Concept. Students will explore the role of the advanced nurse professional and prepare for attainment of enhanced knowledge and skills for post-graduate practice.

■ **NUR642 Chronic Disease and Complex Problems in Older Adults**

The focus of this course is on management of chronic disease and complex care needs of older adults. Emphasis will be on case management and interdisciplinary collaboration to arrange and evaluate care for the most health compromised clients.

■ **NUR685 Advanced Practice in Primary Care I**

This course will present critical concepts the advanced practice nurse can use in delivering evidence-based nursing for the adult population. Using a holistic approach, students will apply theory to practice.

■ **NUR686 Advanced Practice in Primary Care II**

This course prepares students with the skills to function as an advanced practice nurse in addressing chronic and complex alterations in health experienced by the older adult. Gerontology concepts will be applied in meeting the biological, psychosocial, mental, and spiritual needs of the older adult. Students will combine history taking, physical examination techniques, and diagnostic interpretation with problem-solving and clinical strategies.

- NUR625 Educational Theory and Curriculum Design
- NUR635 Instructional Strategies
- NUR660 Nurse Educator Internship

PMC/Nurse Educator Curriculum Descriptions

- **NUR610 Foundation for Post-Graduate Nursing**

This course explores the foundation of post-graduate education and its basis in a Biblical worldview and the SAU Concept. Students will explore the role of the advanced nurse professional and prepare for attainment of enhanced knowledge and skills for post-graduate practice.

- **NUR625 Educational Theory and Curriculum Design**

This course utilizes learning theories to design a teaching/learning project. Strategic planning steps such as needs assessment, behavioral objectives, instructional design, and delivery for non-traditional learners will be explored.

- **NUR635 Instructional Strategies**

Students will delve into the selection and application of instructional strategies for traditional and online learning environments. A variety of approaches for learning experiences in higher education, professional/staff development, and community programs for individuals or groups will be used.

- **NUR660 Nurse Educator Internship**

This course provides individually supervised field experience in clinical settings that integrate concepts in nursing education with practical teaching situations. Students will also design an evidence-based project based on their practice setting. *Prerequisites: NUR 625 and NUR 635*

- **Prerequisite Coursework:**

NUR612 Advanced Pathophysiology
NUR618 Advanced Pharmacology
NUR602 Advanced Health Assessment
NUR633 Health Promotion across the Lifespan

PMC Online Admission Requirements

- MSN degree from a program accredited by the National League for Nursing Accrediting Commission (NLNAC) or the Commission on Collegiate Nursing Education (CCNE)
- Official graduate transcripts from all institutions of higher education attended
- A 3.0 GPA calculated from the most recent 60 academic credits
- An unrestricted, unencumbered, current nursing license from the state of employment; license must be kept current throughout the program
- Two letters of recommendation
- A two-page goal statement that explains your rationale for pursuing a graduate nursing degree
- Completed application

Practicum/Clinical Requirements

- At least six months experience working as a registered nurse preferred
- Provide evidence of current professional malpractice insurance; minimum \$1 to \$3 million prior to Senior Nursing Project
- Compliance with all institutional requirements prior to Senior Nursing Project
- CPR/BLS certification as required, proof of TB testing, any required immunizations, HIPAA training, and any additional requirements
- An internship is required for this program. Convicted felons may be limited to the type of location or client population in which their internships may be conducted*.

**The Joint Commission on Accreditation of Health Care Organizations (JCAHO) institutes regulations in order for hospitals, home health agencies, clinics and so forth to gain or maintain accreditation status. One of these regulations requires that "all persons who are involved in patient care activities - i.e., employees, volunteers and students - must have criminal background checks as well as other health care related checks." Criminal background checks must be initiated by the student and completed prior to beginning any clinically related practicums. See general graduate catalog policy.*
